The astonishing and hugely entertaining story that completely changed the way we run. An epic adventure that began with one simple question: Why does my foot

hurt? “Equal parts quest, physiology treatise, and running history.... The climactic race reads like a sprint.... It simply makes you want to run.” —Outside Magazine
Isolated by Mexico's deadly Copper Canyons, the blissful Tarahumara Indians have honed the ability to run hundreds of miles without rest or injury. In a riveting narrative, award-winning journalist and often-injured runner Christopher

McDougall sets out to discover their secrets. In the process, he takes his readers from science labs at Harvard to the sun-baked valleys and freezing peaks across North America, where ever-growing numbers of ultra-runners are pushing their bodies to the limit, and, finally, to a climactic race in the Copper Canyons that pits America's best ultra-runners against the tribe. McDougall's incredible story will not only

engage your mind but inspire your body when you realize that you, indeed all of us, were born to run. Look for **Born to Run 2**, coming in December! Style Guide Univ of North Carolina Press

Made to Break is a history of twentieth-century technology as seen through the prism of obsolescence. Giles Slade explains how disposability was a necessary condition for America's rejection of tradition and our acceptance of change and impermanence. This book gives us a

detailed and harrowing picture of how, by choosing to support ever-shorter product lives, we may well be shortening the future of our way of life as well.

women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information

directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles.

She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and

maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs. *Explorer Repair Manual*

Simon and Schuster Stephen Crane's immortal masterpiece about the nightmare of war was first published in 1895 and brought its young author immediate international fame. Set during the Civil War, it tells of the brutal disillusionment of a young recruit who had dreamed of the thrill and glory of war, only to find himself fleeing the horror of a battlefield. Shame over his cowardice

drives him to seek to redeem himself by being wounded—earning what he calls the “red badge of courage.” Praised for its psychological insight and its intense and unprecedented realism in portraying the experience of men under fire, The Red Badge of Courage has been a beloved bestseller for more than a century.

No Logo Mercedes-Benz Repair and Tune-Up Guide The Mind Illuminated is a compreh

ensive, accessible and - above all - effective book on meditation, providing a nuts-and-bolts stage-based system that helps all levels of meditators establish and deepen their practice. Providing step-by-step guidance for every stage of the meditation path, this uniquely comprehensive

e guide for a Western audience combines the wisdom from the teachings of the Buddha with the latest research in cognitive psychology and neuroscience. Clear and friendly, this in-depth practice manual builds on the nine-stage model of meditation originally articulated

by the ancient Indian sage Asanga, crystallizing the entire meditative journey into 10 clearly-defined stages. The book also introduces a new and fascinating model of how the mind works, and uses illustrations and charts to help the reader work through each stage. This manual is an essential read for the

beginner to the seasoned veteran of meditation. *The Car Hacker's Handbook* Transportation Research Board Provides extensive information on state-of-the-art diesel fuel injection technology. **Born to Run** Harvard University Press Reprint of a Glenn's manual covering repairs to 180, 190, 200, 219, 220, 230, 250, 300 and 600 models.
