New technologies are radically changing the way that families connect with one another: we can text our teenagers from work, eat dinner with far-away parents via video link, and instantly upload and share photos after a family day out. Whether we are bridging time or distance, and whether we are enhancing our closest relationships or strengthening the bonds of extended family, as computer technologies alter the communication landscape, they in turn are changing the way we conduct and experience family life. This state of the art volume explores the impact of new communication systems on how families interact — how they share their lives and routines, engage in social touch, and negotiate being together or being apart — by considering a range of different family relationships that shape the nature of communication. Composed of three sections, the first looks at what is often the core of a ‘ family ’ , the couple, to understand the impact of technology on couple relationships, communication, and feelings of closeness. The

second section studies immediate families that have expanded beyond just the individual or couple to include children. Here, the emphasis is on connection for communication, coordination, and play. The third section moves beyond the immediate family to explore connections between extended, distributed family members. This includes connections between adult children and their parents, grandparents and grandchildren, and adult siblings. Here family members have grown older, moved away from 'home', and forged new families. Researchers, designers and developers of new communication technologies will find this volume invaluable. **Connecting Families: The Impact of New Communication Technologies on Domestic Life** brings together the most up-to-date studies to help in understanding how new communication technologies shape – and are shaped by – family life, and offers inspiration and guidance for design by making clear what families need and value from technological systems.

Apex Legends: Pathfinder's Quest (Lore Book) Simon & Schuster

The definitive true story of Wild Bill, the first lawman of the Wild West, by the #1 New York Times bestselling author of Dodge City. In July 1865, "Wild Bill" Hickok shot and killed Davis Tutt in Springfield, MO—the first quick-draw duel on the frontier. Thus began the reputation that made him a marked man to every gunslinger in the Wild West. James Butler Hickock was known across the frontier as a soldier, Union spy, scout, lawman, gunfighter, gambler, showman, and actor. He crossed paths with General Custer and Buffalo Bill Cody, as well as Ben Thompson and other young toughs gunning for the sheriff with the quickest draw west of the Mississippi. Wild Bill also fell in love—multiple times—before marrying the true love of his life, Agnes Lake, the impresario of a traveling circus. He would be buried however, next to fabled frontierswoman Calamity Jane. Even before his death, Wild Bill became a legend, with fiction sometimes supplanting fact in the stories that surfaced. Once, in a bar in Nebraska, he was confronted by four men, three of whom he killed in the ensuing gunfight. A famous Harper's Magazine article credited Hickok with slaying 10 men that day; by the 1870s, his career-long kill count was up to 100. The legend of Wild Bill has only grown since his death in 1876, when cowardly Jack McCall famously put a bullet through the back of his head during a card game. Bestselling author Tom Clavin has sifted through years of western lore to bring Hickok fully to life in this rip-roaring, spellbinding true story.

The True Story of the American Frontier's First Gunfighter Disney Electronic Content

It has become popular to blame the American obesity epidemic and many other health-related problems on processed food. Many of these criticisms are valid for some processed-food items, but many statements are overgeneralizations that unfairly target a wide range products that contribute to our health and well-being. In addition, many of the proposed dangers allegedly

posed by eating processed food are exaggerations based on highly selective views of experimental studies. We crave simple answers to our questions about food, but the science behind the proclamations of food pundits is not nearly as clear as they would have you believe. This book presents a more nuanced view of the benefits and limitations of food processing and exposes some of the tricks both Big Food and its critics use to manipulate us to adopt their point of view. Food is a source of enjoyment, a part of our cultural heritage, a vital ingredient in maintaining health, and an expression of personal choice. We need to make those choices based on credible information and not be beguiled by the sophisticated marketing tools of Big Food nor the ideological appeals and gut feelings of self-appointed food gurus who have little or no background in nutrition.

My Misadventure in the Start-Up Bubble John Wiley & Sons

An instant New York Times bestseller, Dan Lyons' "hysterical" (Recode) memoir, hailed by the Los Angeles Times as "the best book about Silicon Valley," takes readers inside the maddening world of fad-chasing venture capitalists, sales bros, social climbers, and sociopaths at today's tech startups. For twenty-five years Dan Lyons was a magazine writer at the top of his profession--until one Friday morning when he received a phone call: Poof. His job no longer existed. "I think they just want to hire younger people," his boss at Newsweek told him. Fifty years old and with a wife and two young kids, Dan was, in a word, screwed. Then an idea hit. Dan had long reported on Silicon Valley and the tech explosion. Why not

join it? HubSpot, a Boston start-up, was flush with \$100 million in venture capital. They offered Dan a pile of stock options for the vague role of "marketing fellow." What could go wrong? HubSpotters were true believers: They were making the world a better place ... by selling email spam. The office vibe was frat house meets cult compound: The party began at four thirty on Friday and lasted well into the night; "shower pods" became hook-up dens; a push-up club met at noon in the lobby, while nearby, in the "content factory," Nerf gun fights raged. Groups went on "walking meetings," and Dan's absentee boss sent cryptic emails about employees who had "graduated" (read: been fired). In the middle of all this was Dan, exactly twice the age of the average HubSpot employee, and literally old enough to be the father of most of his co-workers, sitting at his desk on his bouncy-ball "chair."
