Moving to America turns H&A's life inside out. For all the 10 years of her life, H&A has only known Saigon: the thrills of its markets, the joy of its traditions, the warmth of her friends close by, and the beauty of her very own papaya tree. But now the Vietnam War has reached her home. H&A and her family are forced to flee as Saigon falls, and they board a ship headed toward hope. In America, H&A discovers the foreign world of

Alabama: the coldness of its strangers, the dullness of its food, the strange shape of its landscape, and the strength of her very own family. This is the moving story of one girl's year of change, dreams, grief, and healing as she journeys from one country to another, one life to the next.

The Canine Emotional Detox differs from other books on stress because it focuses on the right combination of elements to reduce stress and to date has over 196 permission-based cases. Take a look at selected before and after photos, pattern discoveries and findings through real life research approach with dogs in a variety of environments, situations, and behavioral challenges. The book is filled with the who, what, where, when, how and why of stress and its affect on dogs. Author, Diane Garrod takes a look at the dog from the inside out, from diet to waste analysis, to

release of stress chemicals within the body and the brain and how the dog thinks and processes information. Think of the CED as a three-day intensive stress neutralization, with the canine taking a well-needed, and deserved holiday, or vacation in a spa-like, pampering process and a way to learn more about the individual dog in the process. From this perspective a final analysis is created, which becomes a customized behavior modification process. What does the CED do?

- Reduces behavior problems.
- Enhances communication and relationships.
- Neutralizes harmful

stress chemicals causing distress or chronic/acute stress. • Takes into account the individual dog's emotions and feelings. • Asks how is the dog coping with real life by uncovering patterns. • Explores how the dog handles touch. • Shows how the dog thinks and processes information with mentally tiring activities. • Creates a productive, results-oriented behavior modification process. • Builds knowledge of the canine, their environment, their family.

- Prepares the dog to learn better, faster and retain longer.
