<u>Dolby Digital Professional Encoding Guidelines</u> Dolby Digital Professional Encoding Guidelines Introduction 1-2 audio can be encoded much more efficiently than in other digital coding systems with comparable audio quality, such as linear PCM. This makes Dolby Digital an excellent choice for systems where high audio quality is desired, but bandwidth or storage space is restricted. *Dolby Digital Professional*

Encoding Guidelines

Dolby Digital Live (DDL) is a real-time encoding technology for interactive media such as video games. It converts any audio signals on a PC or game console into a 5.1-channel 16-bit/48 kHz Dolby Digital format at 640 kbit/s and transports it via a single S/PDIFcable. A similar technology known as DTS Connectis available from competitor DTS.

Since movie content is the largest class of programs to go on DVD, Dolby chose -31 dBFS as the reference level for audio on DVD, where 0 dB represents the maximum encodable digital

sound level (full scale). The dialogue normalization parameter needs to be set to the LAeq level of your program material's dialogue.

Dolby Digital Professional Encoding Guidelines

Faster-than-real-time encoding The Dolby® Media Encoder provides custom metadata instruction for each job that is then submitted to the encoder for processing and encoding. Multiple clients can address the Dolby Media Encoder on a centralized server, or each client computer can encode jobs locally on the client computer.

Dolby Digital Professional

Encoding Guidelines

Dolby's professional encoding solutions offer high-quality and bandwidth-efficient audio content encoding for multiscreen ecosystems. With these solutions, you can format material for more reliable delivery, lower storage requirements, and enhanced playback. Dolby Digital Plus technologies are available in a wide variety of professional encoding

Demux · The Encoding Guide For Dolby Digital Surcode Encoder, the process is pretty much the same as that for DTS-HD Master Audio Suite for loading the WAVs, again changing channel setup as necessary. Go to Options > Encode Options and set as below (changing bitrate as necessary; you don't need 640 for less than 6 channels)
