Never before have we read such jarring headlines, distressing news analyses, or dire predictions concerning the world's financial future. The American housing market -- or, more sentimentally, the American dream -- began to collapse in 2006, taking with it large chunks of the global financial system. Millions of jobs worldwide have vanished forever. Did Bible prophecy predict this catastrophe? Are there biblical clues to how soon, if ever, a viable, long-term recovery can be sustained? Is the financial collapse just one of several signs that we are living in the final days of Earth's history In *THE COMING ECONOMIC ARMAGEDDON*, David Jeremiah says we can know the meaning behind what we see in the daily news -- and understand and prepare for living in the New Global Economy.

Economics is not a field that is known for good writing. Charts, yes. Sparkling prose, no. Except, that is, when it comes to Deirdre Nansen McCloskey. Her conversational and witty yet always clear style is a hallmark of her classic works of economic history, enlivening the dismal science and engaging readers well beyond the discipline. And now she ' s here to share the secrets of how it ' s done. Economical Writing is itself economical: a collection of thirty-five pithy rules for making your writing clear, concise, and effective. Proceeding from big-picture ideas to concrete strategies for improvement at the level of the paragraph, sentence, or word, McCloskey shows us that good writing, after all, is not just a matter of taste—it ' s a product of adept intuition and a rigorous revision process. Debunking stale rules, warning us that " footnotes are nests for pedants, " and offering an arsenal of readily applicable tools and methods, she shows writers of all levels of experience how to rethink the way they approach their work, and gives them the knowledge to turn mediocre prose into magic. At once efficient and digestible, hilarious and provocative, Economical Writing lives up to its promise. With McCloskey as our guide, it ' s impossible not to see how any piece of

writing—on economics or any other subject—can be a pleasure to read.

Schaum's Outline of Mathematical Methods for Business and Economics South-Western Pub

This second edition provides a rigorous yet accessible graduate-level introduction to financial economics. Since students often find the link between financial economics and equilibrium theory hard to grasp, less attention is given to purely financial topics, such as valuation of derivatives, and more emphasis is placed on making the connection with equilibrium theory explicit and clear. This book also provides a detailed study of two-date models because almost all of the key ideas in financial economics can

be developed in the two-date setting. Substantial discussions and examples are included to make the ideas readily understandable. Several chapters in this new edition have been reordered and revised to deal with portfolio restrictions sequentially and more clearly, and an extended discussion on portfolio choice and optimal allocation of risk is available. The most important additions are new chapters on infinite-time security markets, exploring, among other topics, the possibility of price bubbles.

Negotiation is a critical skill needed for effective management. Negotiation: Readings, Exercises, and Cases 7e by Roy J. Lewicki, Bruce Barry, and David M. Saunders takes an experiential approach and explores the major concepts and theories of the psychology of bargaining and negotiation and the dynamics of interpersonal and inter-group conflict and its resolution. It is relevant to a broad spectrum of management students, not only human resource management or industrial relations candidates. The Readings portion of the book is ordered into seven sections: (1) Negotiation Fundamentals, (2) Negotiation Subprocesses, (3) Negotiation Contexts, (4) Individual Differences, (5) Negotiation across Cultures, (6) Resolving Differences, and (7) Summary. The next section of the book presents a collection of role-play exercises, cases, and self-assessment questionnaires that can be used to teach negotiation processes and subprocesses.
