50% of the air dryer ' s total cost over a five-year period. Reduced Indirect Costs Electricity required by the compressor to compensate for pressure drops in the air dryer accounts for around 25% of its total cost over 5 years. Parker ' s DRD Series offers average pressure drops which are about one half those of conventional systems. The air compressor requires additional energy to offset the ...

### [PNEUDRI - ParkerStore](#)

The dryer contains two desiccant chambers, while one chamber is drying the compressed air (adsorption), the other chamber is simultaneously undergoing regeneration (desorption). At a predetermined time both exhaust valves close and repressurisation begins. Every three minutes the chambers are reversed in function, this is the changeover point.
