Don ’ t Even Think About It argues that the answers to these questions do not lie in the things that make us different and drive us apart, but rather in what we all share: how our human brains are wired, our evolutionary origins, our perceptions of threats, our cognitive blindspots, our love of storytelling, our fear of death, and our deepest instincts to

defend our family and tribe.

Welcome to the worst fear of the anti-
vaccination movement: A group of teens
develop telepathy from flu shots. Homeroom
10B at New York 's Bloomberg High School
is a pretty typical collection of sophomores.
Don't Even Think About It: Why Our Brains Are
Wired to ...

Don't Even Think About It is a sprightly-written
cornucopia of insight into the pitfalls and potential
of communicating about climate change. Not as
pessimistic as the title and subtitle might suggest,
Marshall argues that we are both wired to ignore a
problem like climate change (distant, abstract,
without clear villains) and that we are wired to
respond – capable of putting aside short-term self-
interest for quite heroic collective efforts in the face
of a shared problem or threat.
