Health care systems worldwide are faced with the challenge of improving the quality of care. Providing evidence from health research is necessary but not sufficient for the provision of optimal care and so knowledge translation (KT), the scientific study of methods for closing the knowledge-to-action gap and of the barriers and facilitators inherent in the process, is gaining significance. Knowledge Translation in Health Care explains how to use research findings to improve health care in real life, everyday situations. The authors define and describe knowledge translation, and outline strategies for successful knowledge translation in practice and policy making. The book is full of examples of how knowledge translation models work in closing the gap between evidence and action. Written by a team of authors closely involved in the development of knowledge translation this unique book aims to extend

understanding and implementation worldwide. It is an introductory guide to an emerging hot topic in evidence-based care and essential for health policy makers, researchers, managers, clinicians and trainees.

Being mistaken for someone else, being falsely depicted as an important international heroin importer and trafficker, and being made an unwilling accessory to murder aren ’ t everyday occurrences. Surely this is not how the police behave to get their man? But...what if they go further? What if, with the aid of a tuggish civil agent, the RCMP implement a buy and bust operation, a Final Solution to get rid of you? And what if a Mountie is killed in the process under very nebulous circumstances? A chilling scenario that becomes even more disconcerting when members of the RCMP commit perjury to insure your conviction and cover up the true circumstances surrounding their colleague ’ s death. But, what about you being sentenced to death as a result of this and a trial littered with lying witnesses and tainted evidence that sends you on a path meant to shatter your already broken life? And...what if, in the end, Canadian legal institutions and

ministries opt to defend the undefendable in order to protect the RCMP ' s integrity and the image of Canada? Known as Bang Kwang prison inmate 482/33, my name is Alain Olivier. I learned first-hand what it means to be treated as expendable when the RCMP screws things up during a sketchy buy & bust operation oversea. This was my struggle against all odds to survive in the jungle of Bang Kwang prison, a true story that has something for everyone—drugs, murder, threats, violence, conflict of interest, political corruption, coverups, and my faint hope that the Canadian government would come to its senses and bring me home.
