Fantasies of omnipotence grow out of feelings of helplessness. We are all born helpless, completely dependent on others for nurturance and survival, and we all must face the ultimate

annihilation of the self at the end of life. While fantasies of omnipotence help us to cope with these painful acts, they may also interfere with our ability to engage reality and deal with life. This important new book addresses all aspects of omnipotence, from the merger fantasies of the baby who feels like an extension of the powerful parent, to the rigid defense omnipotent fantasies of the frightened borderline patient, to the soothing spiritual and religious feelings that help many accept loss and mortality. Contributions by noted authors like Otto Kernberg, Jack and Kerry Kelly Novick, Henry Krystal, Paul Ornstein and Steven Ellman should make this a valuable resource to all clinicians and other students of human behaviour.

Referred to by travellers as "the bible of North Country travel" since it was first published in 1949, The Milepost is an essential travel companion for anyone planning or taking a trip to Alaska, Yukon Territory, Northwest Territories, northern Alberta or northern British Columbia. Travellers will find detailed mile-by-mile road logs and maps of all northern routes, including the famous Alaska Highway. The Milepost is updated annually by experienced field editors, providing accurate and up-to-date information on

attractions, activities, food, gas, lodging and camping. Details are provided for every city and town along the way. Travel by air, ferry, cruise ship, bus and rail is also covered. Every edition of The Milepost includes Alaska State Ferry and B.C. Ferries schedules, important information on crossing the border, a calendar of events, a pull-out Plan-a-Trip map, litre-to-gallon conversions and dozens of other travel tips. Special features highlight side-trip destinations, gold rush and highway history, and places to eat and things to do. With its wealth of detail, The Milepost is a wonderful resource for anyone interested in the North, whether it is the trans-Alaska pipeline, bird watching, Native culture, or glaciers and wildlife viewing, to name just a few attractions. This classic travel guide is a

must for every Northland traveller.

The Humvee, the modern-day US military four-wheel-drive successor to the Willys Jeep, is used by numerous armed forces around the world and in some civilian adaptations. Over 10,000 Humvees were deployed in numerous roles by coalition forces during the Iraq war. At least 25 variants of this highly versatile vehicle have been produced, from unarmoured light transport to surface-to-air missile platform, including ambulances, tracked versions, troop carriers and special ops variants. This manual provides a unique insight into the world of military Humvees, with an

emphasis on military operation and equipment.

Polymodeling is a modeling technique used in 3d modeling. Unlike box modeling, or other forms of modeling where you start out with a basic form or

primitive object that determines the mass of an object, artists can use the polygon (the basic building block of all of the primitives available in 3ds Max). This approach allows for more control over the flow, placement and detail of the meshes that are built. Placement of vertices/points, edges and all other sub-elements that build our models is determined by the user, rather than pre-determined by a computer generated primitive. This book is a collection of tips, tricks and techniques on how to create professional models for advertising on T.V and the web. The author has tons of industry experience using Max toward this end, and he shares the secrets of his trade. As Production Modeler for some of today's hottest studios (including GuerillaFx, Coke Zero, MTV, Old Navy, Nike, Target, HP) Todd Daniele brings real-world experience to the book. Daniele teaches the technical aspects of polymodeling, while showing how to ultimately create content in a dynamic,

efficient manner. Associated web site offers instructional files that show the models in progressive stages of development; plus a supporting internet forum: readers can log-on to this forum to ask questions or comment on anything covered in the book.

Information visualization is the act of gaining insight into data, and is carried out by virtually everyone. It is usually facilitated by turning data - often a collection of numbers -

into images that allow much easier comprehension. Everyone benefits from information visualization, whether internet shopping, investigating fraud or indulging an interest in art. So no assumptions are made about specialist background knowledge in, for example, computer science, mathematics, programming or human cognition. Indeed, the book is directed at two main audiences. One comprises first year students of any discipline. The other comprises graduates - again of any discipline - who are taking a one- or two-year course of training to be visual and interaction designers. By focusing on the activity of design the pedagogical approach adopted by the book is based on the view that the
