Lauren Groff? The Universe Underground by Paolo Giordano? We All Hated Each Other So Much by Frank Westermann?Plus: discovering new planets and destroying satellites; returning to the Moon (this time to stay); the Mars delusion; the hunt for extra-terrestrial life, and much more... In the 1960s, the rivalry between the superpowers brought us into space, adding a whole new dimension to human life. The last frontier was open: between 1969 and 1972 twelve men (but no women) walked on the moon. No one has since. The space race revealed itself for what it really was: a political and military competition. Space agencies, however, have not been idle and the exploration of the solar system has continued with probes and robots. Without politics, science has thrived. But the lack of government funding has opened space exploration to the forces of capitalism: the race has started again, with different rules and different players. For those of us who remain on Earth, space offers a spiritual dimension, and the

### **Econometric Models and Economic Forecasts**

Six months after its American introduction in 1985, the Yugo was a punch line; within a year, it was a staple of late-night comedy. By 2000, NPR's Car Talk declared it "the worst car of the millennium." And for most Americans that's where the story begins and ends. Hardly. The short, unhappy life of the car, the men who built it, the men who imported it, and the decade that embraced and discarded it is rollicking and astounding, and one of the greatest untold business-cum-morality tales of the 1980s. Mix one rabid entrepreneur, several thousand "good" communists, a willing U.S. State Department, the shortsighted Detroit auto industry, and improvident bankers, shake vigorously, and you've got The Yugo: The Rise and Fall of the Worst Car in History. Brilliantly re-creating the amazing confluence of events that produced the Yugo, Yugoslav expert Jason Vuic uproariously tells the story of the car that became an international joke: The American CEO who happens upon a Yugo right when his company needs to find a new import or go under. A State Department eager to aid Yugoslavia's nonaligned communist government. Zastava Automobiles, which

overhauls its factory to produce an American-ready Yugo in six months. And a hole left by Detroit in the cheap subcompact market that creates a race to the bottom that leaves the Yugo . . . at the bottom.
