Community Engagement in Higher Education

Boydell & Brewer

Efforts have been made toward the application of electronic government in the developing world, yet questions of how to best implement governance systems and address concerns from officials and citizens alike remain to be answered. *Emerging Issues and Prospects in African E-Government* explores relevant practices, trends, and potential challenges facing fledgling governments in the digital era. This book focuses on the establishment and maintenance of e-government in various African countries, providing critical insights for government bodies, policymakers, administrators, and public sector researchers working in local, state, and national governments around the world. *Regional and Socio-economic Origins of Students in Kenyan Public Universities* Taylor & Francis

Agriculture has been an enduring human tradition key to survival and civilization. However, after the advent of industrialization and agricultural growth, the industry has been met with several challenges including pollution, land use, and food insecurity. With the agricultural industry contributing to pollution and emissions, many have found it imperative to investigate the causes and seek out solutions. *The Research Anthology on Strategies for Achieving Agricultural Sustainability* discusses the issues that the agricultural industry currently faces and the technological opportunities that can be explored to help protect and predict crop growth and achieve more resilient agricultural processes. It analyzes the impact of agricultural pollution and food insecurity on a global scale, but also proposes solutions to promote agricultural sustainability. Covering topics such as bio-farming, smart farming, and population growth, this book is an indispensable resource for government officials, agricultural scientists, farmers, students and professors of higher education, activist groups, researchers, and academicians.

Cultural Impact on Conflict Management in Higher Education shares information regarding conflict management and resolution in higher education from a global perspective. In this book, we introduced many conflict resolution methods from different regions in the world. You can borrow some successful strategies and examine the differences and similarities between contexts. The book shares a conflict resolution model which may direct the reader to start thinking about addressing and managing conflicts from different levels of organizations. This book is a collective work of authors coming from all over the world. We chose higher education as the context because it is a place where diverse thoughts, perspectives, and people come together. Because of the potential richness of diversity on a college campus, the opportunity for conflicts occurs. Managing conflict does not work when there is a “one-way only approach/model” for addressing conflict. Some conflict resolution encompasses multiple dimensions: (a) one’s personal beliefs or beliefs about an issue; (b) an individual’s personal history in terms of how the conflict was perceived as something to be discussed or not; (c) work culture of the conflict where if ‘one has a conflict,’ the person or unit is messing up or there is a problem person; (d) the unconscious strategies of ‘face saving’ (trying to maintain one’s image) present; (e) social hierarchies or relationships; and (f) the diversity dimensions and issues that may be present.

Kenyan Public Universities in the Age of Internationalization Routledge
 There seems to be renewed interest in having universities and other higher education institutions engage with their communities at the local, national, and international levels. But what is community engagement? Even if this interest is genuine and widespread, there are many different concepts of community service, outreach, and engagement. The wide range of activity encompassed by community engagement suggests that a precise definition of the “community mission” is difficult and organizing and coordinating such activities is a complex task. This edited volume includes 18 chapters that explore conceptual understandings of community engagement and higher education reforms and initiatives intended to foster it. Contributors provide empirical research findings, including several case study examples that respond to the following higher education community engagement issues. What is “the community” and what does it need and expect from higher education institutions? Is community engagement a mission of all types of higher education institutions or should it be the mission of specific institutions such as regional or metropolitan universities, technical universities, community colleges, or indigenous institutions while other institutions such as major research universities should concentrate on national and global research agendas and on educating internationally-competent researchers and professionals? How can a university be global and at the same time locally relevant? Is it, or should it be, left to the institutions to determine the scope and mode of their community engagement, or is a state mandate preferable and feasible? If community engagement or “community service” are mandatory, what are the consequences of not complying with the mandate? How effective are policy mandates and university engagement for regional and local economic development? What are the principal features and relationships of regionally-engaged universities? Is community engagement to be left to faculty members and students who are particularly socially engaged and locally embedded or is it, or should it be, made mandatory for both faculty and students? How can community engagement be (better) integrated with the (other) two traditional missions of the university—research and teaching? Large-scale displacement - whether caused by war, state-related political or development projects, different forms of political violence, structural crisis, or even natural disasters - evokes many stereotyped assumptions about those forcibly displaced or emplaced. At the same time there is a problematic lack of attention paid to the diversity of actors, strategies and practices that reshape the world in the face (and chronic aftermath) of dramatic moments of violent dislocation. In this highly original volume, based on empirical case studies from across sub-Saharan Africa, the authors reveal the paradoxical effects, both intended and unexpected, that displacement produces, and that manifest themselves in displacement economies. An important contribution to a topic of growing scholarly and policy interest.

Data Processing Techniques and Applications for Cyber-Physical Systems (DPTA 2019) Taylor & Francis

The aftermath of recent Kenyan elections has been marred by violence and an apparent crisis in democratic governance, with the negotiated settlement resulting from the 2007 election bringing into sharp focus longstanding problems of state and society. The broader reform process has involved electoral, judicial and security-sector reforms, among others, which in turn revolve around constitutional reforms. Written by a gathering of eminent specialists, this highly original volume interrogates the roots and impact of the 2010 constitution. It explains why reforms were blocked in the past but were successful this time around, and explores the scope for their implementation in the face of continued resistance by powerful groups. In doing so,

the book demonstrates that the Kenyan experience carries significance well past its borders, speaking to debates surrounding social justice and national cohesion across the African continent and beyond. Concepts and Advances in Information Knowledge Management Jones & Bartlett Publishers

All recent books on international social work mention Africa only briefly and few engage with the broader field of development studies. This book focuses solely on the unique African context engaging with issues relating to social work and development more broadly thus enabling a deeper examination and more complex and nuanced picture to emerge. Unlike most academic works, this book highlights multiple practitioner voices, with authors or co-authors that have recently been or are currently practising social workers. As an edited book, it draws from both academic research as well as lived practice experience, supported by strong theoretical positioning and guidance in introductory chapters, drawing on African literature, wherever possible. Looking at case-studies from Lesotho, Botswana, Kenya, Zimbabwe, Ethiopia, Namibia, Uganda, Nigeria, Kenya, South Africa, Rwanda, Zambia and Tanzania and covering established areas of practice such as child protection; working with older people; working with people with disabilities; mental health; and mainstream services targeting women as well as emerging areas of developmental social work practice, such as humanitarian assistance in post-conflict situations; work with immigrants and refugees; and the training of community-based workers, this book takes a future-oriented perspective that aims to move beyond well-worn critiques to envision constructive and sustainable futures for social work and social development in Africa from a critical perspective.
