Modern Techniques for Agricultural Disease Management and Crop Yield Prediction

Springer
This book covers cutting-edge and advanced research on data processing techniques and applications for Cyber-Physical Systems. Gathering the proceedings of the International Conference on Data Processing Techniques and Applications for Cyber-Physical Systems (DPTA 2019), held in Shanghai, China on November 15-16, 2019, it examines a wide range

of topics, including: distributed processing for sensor data in CPS networks; approximate reasoning and pattern recognition for CPS networks; data platforms for efficient integration with CPS networks; and data security and privacy in CPS networks. Outlining promising future research directions, the book offers a valuable resource for students, researchers and professionals alike, while also providing a useful reference guide for newcomers to the field.

This book provides deep insights about women in

higher education and their contributions to society. Using Kenya as a case study, it places women in higher education at the center of the socioeconomic, political and cultural discourse both within and outside the higher education institution. It is notable that even with the progress made, both in Kenya and globally, gender considerations in social, economic, political and cultural spheres is still minimal. In higher education, gender imbalance is still distinct in varied areas such as career advancement, leadership, mentorship, and scholarship opportunities. In society, women's efforts still seem to go unnoticed. The aim of these chapters, therefore, is to share women's research in higher education and in society especially innovative policy and practice concepts, all aimed at contributing to social transformation.

Effective information and knowledge resource management is a driver of competitiveness. Many developing countries have put mechanisms in place that seek to match

knowledge-based economies, where information has become the fuel for responsiveness, innovation, and competition. Concepts and Advances in Information Knowledge Management brings out emerging and current discussion from the sub-fields of information management in this environment. This title consists of sections on key aspects of information knowledge management and addresses knowledge management, library studies, archives and records management, and information systems. Presents research aimed at harmonizing theory and practice of general information management paradigms Gives insight into the place of archives, records management, and information technology impacting socio-economic value chains Disseminates theoretical and applied models, and information management system architecture emerging from cloud computing and retrieval systems Supporting safety of journalists in Kenya The Status of Student Involvement in University

Governance in Kenya

The aftermath of recent Kenyan elections has been marred by violence and an apparent crisis in democratic governance, with the negotiated settlement resulting from the 2007 election bringing into sharp focus longstanding problems of state and society. The broader reform process has involved electoral, judicial and security-sector reforms, among others, which in turn revolve around constitutional reforms. Written by a gathering of eminent specialists, this highly original volume interrogates the roots and impact of the 2010 constitution. It explains why reforms were blocked in the past but were successful this time around, and explores the scope for their implementation in the face of continued resistance by powerful groups. In doing so, the book demonstrates that the Kenyan experience carries significance well past its borders, speaking to debates surrounding social justice and national cohesion across the African continent and beyond.

Taking into consideration the variety of information being

created, produced, and published, the acquisition and archiving of e-resources by digital libraries is rapidly increasing. As such, managing the rights to these resources is imperative. The Handbook of Research on Managing Intellectual Property in Digital Libraries is a pivotal reference source for the latest scholarly research on strategies in which digital libraries engage in the management of increasing digital intellectual property to protect both the users and the creators of the resources. Featuring coverage on a broad range of topics such as copyright management, open access, and software programs, this book is ideally designed for academicians, researchers, and practitioners seeking material on property rights and e-resources.

Data Processing Techniques and Applications for Cyber-Physical Systems (DPTA 2019) Chandos Publishing

The proliferation of entrepreneurship, technological and business innovations, emerging social trends and lifestyles, employment patterns, and other developments in the global context involve creative destruction that transcends geographic and political boundaries and economic sectors and industries. This creates a need for an interdisciplinary exploration of disruptive technologies, their impacts, and their implications for various stakeholders widely ranging from government agencies to major

corporations to consumer groups and individuals. Disruptive Technology: Concepts, Methodologies, Tools, and Applications is a vital reference source that examines innovation, imitation, and creative destruction as critical factors and agents of socio-economic growth and progress in the context of emerging challenges and opportunities for business development and strategic advantage. Highlighting a range of topics such as IT innovation, business strategy, and sustainability, this multi-volume book is ideally designed for entrepreneurs, business executives, business professionals, academicians, and researchers interested in strategic decision making using innovations and competitiveness.

The media plays an intricate role in the political economy of developing nations as it conveys the social issues and impacts of a government 's legislation and policy. However, information is often miscommunicated or biased in emergent economies as media owners often tailor news and advertisements to promote their own agendas rather than meet the needs of citizens. Political Influence of the Media in Developing Countries analyzes the use

and structure of media in political forums in developing nations. Featuring research on the effects of the media on news consumption and the professional and ethical difficulties journalists and editors face in the dissemination of political messages, this publication is an essential reference source for policy makers, academicians, politicians, students, and researchers interested in the adoption of various media formats used to promote the political environment and civic engagement within developing countries. Disruptive Technology: Concepts, Methodologies, Tools, and Applications African Books Collective Since agriculture is one of the key parameters in assessing the gross domestic product (GDP) of any country, it has become crucial to transition from traditional agricultural practices to smart agriculture. New agricultural technologies provide numerous opportunities to maximize crop yield by recognizing and analyzing diseases and other natural variables that may affect it. Therefore, it is necessary to understand how computer-assisted technologies can best

be utilized and adopted in the conversion to smart agriculture. Modern Techniques for Agricultural Disease Management and Crop Yield Prediction is an essential publication that widens the spectrum of computational methods that can aid in agriculture disease management, weed detection, and crop yield prediction. Featuring coverage on a wide range of topics such as soil and crop sensors, swarm robotics, and weed detection, this book is ideally designed for environmentalists, farmers, botanists, agricultural engineers, computer engineers, scientists, researchers, practitioners, and students seeking current research on technology and techniques for agricultural diseases and predictive trends.

Narrative, Identity and Ethics in Postcolonial Kenya IGI Global This book examines the concept of the democratization of governance in universities in Kenya with particular emphasis on students involvement in governance processes and decision making. Data were collected from members of the student community utilizing a structured self-administered questionnaire and from purposively selected key informants and focus group discussants drawn from Kenyatta

University (representing the public sector) and the United States International University (representing the private sector). The guiding argument for the study was that shared governance, one of the principles of good governance, is critical in enabling the universities to deliver their visions and the missions effectively. The results revealed that while in principle, Kenyan universities have embraced democratic governance in which all stakeholders, including students, have a role to play, in practice they continue to violate the core principles of good governance, particularly shared governance. Specifically, students, who are major stakeholders in university education, are largely excluded from significant structures of governance thereby limiting their influence and participation. Although their representation is mainly provided via student self-governance organs (unions, associations and/or councils), their effectiveness is undermined considerably by the lack of trust and confidence of the student body and the unending manipulation by top university administrators and external political actors. Student active involvement in decision making is mainly confined to lower levels such as the school/faculty and departmental/programme. The authors call for a paradigm shift in the involvement of students in the governance of universities in ways that discourage the current culture of tokenism and political correctness that characterizes public and private universities in Kenya.

Displacement Economies in Africa IAP As the demand for education at all levels has increased, so have the models of meeting these increased demands for education. As in many other parts of the world, public education has expanded to serve large populations across the regions of Africa, the Caribbean, and the Middle East. Many nations in these regions have instituted mandates, policies, and frameworks intended to simultaneously increase access to public education opportunities as well as improve the quality of education provided and to address a wide populace. Because the increase in educational demand has occurred at all levels, these efforts often address various levels of education from early childhood through primary schooling, junior secondary and secondary schooling and into tertiary education. Efforts also have been made to increase participation in education by marginalized and/or special populations. The range of efforts is large with some focusing on involving migrants/immigrants/refugees in primary education while others aim at opening up choices at the university level. Recently, nations in the region have recognized the possibilities of digital learning

(online learning) as cell phones and other widely used portable wireless devices have made it possible to sell the idea that one can learn from anywhere at any time. This widespread access to technology has made it possible for governments as well as private entities to expand learning opportunities even to populations previously unreached or to address difficult to reach sectors of the population. At the same time, the population itself has not only increased in numbers but in diversity. Maintaining quality through digital and other means of quick expansion of educational opportunities continues to be challenging if not problematic. Effects of Government Mandates and Policies on Public Education in Africa, the Caribbean, and the Middle East is Book IX of the series, Research on Education in Africa, the Caribbean, and the Middle East. Chapters document, describe and/or raise critical issues and/or questions resulting from government policies, mandates and frameworks intended to make available public education to an ever-growing populace while at the same time being mindful of improving quality of education being availed to an increasingly diverse populace.

Information Communication Technology (ICT) Integration to Educational Curricula
Rowman & Littlefield

The second edition of the Impact Evaluation in Practice handbook is a comprehensive and accessible introduction to impact evaluation for policy makers and development practitioners. First published in 2011, it has been used widely across the development and academic communities. The book incorporates real-world examples to present practical guidelines for designing and implementing impact evaluations. Readers will gain an understanding of impact evaluations and the best ways to use them to design evidence-based policies and programs. The updated version covers the newest techniques for evaluating programs and includes state-of-the-art implementation advice, as well as an expanded set of examples and case studies that draw on recent development challenges. It also includes new material on research ethics and partnerships to conduct impact evaluation. The handbook is divided into four sections: Part One discusses what to evaluate and why; Part Two presents the main impact evaluation methods; Part Three addresses how to manage impact evaluations; Part Four reviews impact evaluation sampling and data collection. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online, including an applied

case as well as questions and answers. The updated second edition will be a valuable resource for the international development community, universities, and policy makers looking to build better evidence around what works in development.

Transnational Distance Learning and Building New Markets for Universities Routledge Information Communication Technology (ICT) Integration to Educational Curricula serves as a standard textbook in graduate and senior level undergraduate classes in colleges and universities to contribute to the existing mass communication and ICT literature. The textbook offers a multi-discipline perspective to students of mass communication and information technology and avails them an opportunity to have a valid research tool with great details to pursue their research and class assignments. It provides an essential platform for appropriate literature in mass communication, political communication, and ICT details with relevance to its integration in Africa educational curricula. The book can also serve as a supplemental text for courses in mass media effects, politics, and political communications. It includes contributions by scholars and professionals of African extraction with varied research interests on diverse issues relevant to ICT and its significant impact to curricula development and application to Africa as the new African educational system. The chapters cover a wide array of mass communication, diffusion of

innovation, and ICT issues of diverse importance that will guide students, government agencies, and professionals in following the imminent and evolving changes resulting from the integration of technology to educational curricula.

Peace Education IGI Global
The Sustainable Development Goals (SDGs) (2016-2030) set by the United Nations in 2015 restated the importance of universal primary education for all, and specifically discuss quality, equity, and inclusion in basic education. To achieve this, the role of community has been emphasized and participation has become a "buzzword" in international development over the past several decades. Despite the growing attention to community participation in school management, previous literature has shown mixed results in terms of its actual practice and its impacts on quality, equity, and inclusion in education. This book deepens the contextual understanding of community in developing countries and its involvement in schools in general, and its impact on quality, equity, and inclusion of school education in particular. By presenting various case studies in Asia, Africa, Latin America, and a post-conflict state in Europe, the book analyses commonalities and differences in the ways communities are involved and cast their impacts and challenges. The book contributes knowledge on the ways in which community involvement could work in developing countries, the detailed processes and factors that make community participation work in

different dimensions, and remaining challenges that scholars and practitioners still need to be concerned and mindful in the field. This book will appeal to both researchers and practitioners who are concerned about the community participation approach for the SDGs.

This handbook examines policy research on school counseling across a wide range of countries and offers guidelines for developing counseling research and practice standards worldwide. It identifies the vital role of counseling in enhancing students' educational performance and general wellbeing, and explores effective methods for conducting policy research, with practical examples. Chapters present the current state of school-based counseling and policy from various countries, focusing on national and regional needs, as well as opportunities for collaboration between advocates and policymakers. By addressing gaps in policy knowledge and counselor training, the Handbook discusses both the diversity of prominent issues and the universality of its major objectives. Topics featured in

this handbook include: The use of scoping reviews to document and synthesize current practices in school-based counseling.

Contemporary public policy on school-based counseling in Latin America. Policy, capacity building, and school-based counseling in Eastern/Southern Africa. Public policy, policy research, and school counseling in Middle Eastern countries. Policy and policy research on school-based counseling in the United Kingdom. Policy research on school-based counseling in the United States. The International Handbook for Policy Research in School-Based Counseling is a must-have resource for researchers, graduate students, clinicians, and related professionals and practitioners in child and school psychology, educational policy and politics, social work, psychotherapy, and counseling as well as related disciplines.

Human rights and equality in education Springer Nature
This book provides a framework for evaluating big data and cloud computing based on how they evolve to fit users' needs in developing countries in key areas, such as agriculture and education. The authors discuss how this framework can be utilized by businesses, governments, and

consumers to accelerate economic growth and overcome information and communication barriers. By examining the ways in which cloud computing can drive social, economic, and environmental transformation, readers gain a nuanced understanding of the opportunities and challenges these technologies offer. The authors also provide an authoritative and up-to-date account of big data's diffusion into a wide range of developing economies, such as Brazil and China, illustrating key concepts through in-depth case studies. Special attention is paid to economic development in the context of the new Sustainable Development Goals formulated by the United Nations, introducing readers to the most modern standard of economic evaluation. Students of information management, entrepreneurship, and development, as well as policy makers, researchers, and practitioners, will find *Big Data and Cloud Computing for Development* an interesting read and a useful reference source.
