From the author of *Argo* comes an unforgettable behind-the-scenes story of espionage in action. In the first ever memoir by a top-level operative to be authorized by the CIA, Antonio J. Mendez reveals the cunning tricks and insights that helped save hundreds from deadly situations. Adept at creating new identities for anyone, anywhere, Mendez was involved in operations all over the world, from "Wild West" adventures in East Asia to Cold War intrigue in Moscow. In 1980, he orchestrated the escape of six Americans from a hostage situation in revolutionary Tehran, Iran. This extraordinary operation inspired the movie *Argo*, directed by and starring Ben Affleck. *The Master of Disguise* gives us a privileged look at what really happens at the highest levels of international espionage: in the field, undercover, and behind closed doors.

Across the River and Into the Trees Penguin UK

In the fall of 1948, Ernest Hemingway made his first extended visit to Italy in thirty years. His reacquaintance with Venice, a city he loved, provided the inspiration for *Across the River and into the Trees*, the story of Richard Cantwell, a war-ravaged American colonel stationed in Italy at the close of the Second World War, and his love for a young Italian countess. A poignant, bittersweet homage to love that overpowers reason, to the resilience of the human spirit, and to the worldweary beauty and majesty of Venice, *Across the River and into the Trees* stands as Hemingway's statement of defiance in response to the great dehumanizing atrocities of the Second World War. Hemingway's last full-length novel published in his lifetime, it moved John O'Hara in *The New York Times* Book Review to call him "the most important author since Shakespeare."

Surprise... your target. Kill... your enemy. Vanish... without

a trace. From Pulitzer Prize finalist Annie Jacobsen, the untold story of the CIA's secret paramilitary units. When diplomacy fails, and war is unwise, the president calls on the CIA's Special Activities Division, a highly-classified branch of the CIA and the most effective, black operations force in the world. Originally known as the president's guerrilla warfare corps, SAD conducts risky and ruthless operations that have evolved over time to defend America from its enemies. Almost every American president since World War II has asked the CIA to conduct sabotage, subversion and, yes, assassination. With unprecedented access to forty-two men and women who proudly and secretly worked on CIA covert operations from the dawn of the Cold War to the present day, along with declassified documents and deep historical research, Pulitzer Prize finalist Annie Jacobsen unveils-like never before-a complex world of

individuals working in treacherous environments populated with killers, connivers and saboteurs. Despite Hollywood notions of off-book operations and external secret hires, covert action is actually one piece in a colossal foreign policy machine. Written with the pacing of a thriller, SURPRISE, KILL, VANISH brings to vivid life the sheer pandemonium and chaos, as well as the unforgettable human will to survive and the intellectual challenge of not giving up hope that define paramilitary and intelligence work. Jacobsen's exclusive interviews-with members of the CIA's Senior Intelligence Service (equivalent to the Pentagon's generals), its counterterrorism chiefs, targeting officers, and Special Activities Division's Ground Branch operators who conduct today's close-quarters killing operations around the world-reveal,for the first time, the enormity of this shocking, controversial and morally

complex terrain. Is the CIA's paramilitary army America's weaponized strength, or a liability to its principled standing in the world? Every operation reported in this book, however unsettling, is legal.

and George Ade (1866-1944) were trustees, distinguished alumni and benefactors of Purdue University. Their friendship began in 1922 and led to their giving land and money for the 1924 construction of Ross-Ade Stadium, now a 70,000 seat athletic landmark on the West Lafayette campus. Their life stories date to 1883 Purdue and involve their separate student experiences and eventual fame. Their lives crossed paths with U.S. First Lady Eleanor Roosevelt, Henry Ford, Amelia Earhart, and Will Rogers among others. Gifts or ideas from Ross or Ade led to creation of the Purdue Research Foundation, Purdue Airport, Ross Hills Park, and Ross Engineering

Camp. They helped Purdue Theater, the Harlequin Club and more. Ade, renowned author and playwright, did butt heads with Purdue administrators at times long ago, but remains a revered figure. Ross's ingenious mechanical inventions of gears still steer millions of motorized vehicles, boats, tractors, even golf carts the world over.

“Keep away from MR. AURIC GOLDFINGER. He is a most powerful man. If he wished to crush you, he would only have to roll over in his

sleep to do so.”

OPERATION GRAND SLAM Secret agent James Bond had been warned not to tangle with Goldfinger. But the super-criminal’s latest obsession was too strong, too dangerous. He had to be stopped. Goldfinger was determined to take possession of half the supply of mined gold in the world—to rob Fort Knox! For this incredible venture he had enlisted the aid of the top criminals in the U.S., including a bevy of beautiful thieves from the Bronx. And he had conceived so foolproof a plan that it would take all of Bond’s unique talents to make it fail—as fail it must. JAMES BOND challenges GOLDFINGER, THE MOST EVIL GENIUS HE

HAS EVER FACED. He's a phenomenal criminal who likes his women dressed only in gold paint. He's a magnificent fiend who carries his cash in gold bars. He's a powerful villain who plans to pull the biggest and boldest crime in history—the robbery of all the gold in Fort Knox. "It's all marvellously intricate and polished storytelling, all absurdly impossible, all superlative fun."—Cleveland News. The book that inspired the major new motion picture *Mandela: Long Walk to Freedom*. Nelson Mandela is one of the great moral and political

leaders of our time: an international hero whose lifelong dedication to the fight against racial oppression in South Africa won him the Nobel Peace Prize and the presidency of his country. Since his triumphant release in 1990 from more than a quarter-century of imprisonment, Mandela has been at the center of the most compelling and inspiring political drama in the world. As president of the African National Congress and head of South Africa's antiapartheid movement, he was instrumental in moving the nation toward multiracial government and majority rule. He is revered everywhere as a vital force in the fight for human rights and racial equality. LONG WALK TO

FREEDOM is his moving and exhilarating autobiography, destined to take its place among the finest memoirs of history's greatest figures. Here for the first time, Nelson Rolihlahla Mandela tells the extraordinary story of his life--an epic of struggle, setback, renewed hope, and ultimate triumph. Ross-Ade CreateSpace Before the Internet became widely known as a global tool for terrorists, one perceptive U.S. citizen recognized its ominous potential. Armed with clear evidence of computer espionage, he began a highly personal quest to expose a hidden network of spies that threatened national security. But would the authorities back him up? Cliff Stoll's dramatic firsthand account is "a computer-age detective story, instantly fascinating [and] astonishingly gripping"

(Smithsonian). Cliff Stoll was an astronomer turned systems manager at Lawrence Berkeley Lab when a 75-cent accounting error alerted him to the presence of an unauthorized user on his system. The hacker's code name was "Hunter"—a mysterious invader who managed to break into U.S. computer systems and steal sensitive military and security information. Stoll began a one-man hunt of his own: spying on the spy. It was a dangerous game of deception, broken codes, satellites, and missile bases—a one-man sting operation that finally gained the attention of the CIA . . . and ultimately trapped an international spy ring fueled by cash, cocaine, and the KGB.

This book enters into the point of view of the ancient world in order to explain how they saw the world, and to show what

arguments were used by Aristotle to support this view. Lang demonstrates a new method for reading the texts of Aristotle by revealing a continuous line of argument running from the Physics to De Caelo, and analyzes a group of arguments that are almost always treated in isolation from one another to reveal their elegance and coherence. She establishes the case that we must rethink our approach to Aristotle's physical science and Aristotelian texts.
