Governments, businesses, and individuals around the world are thinking about what happens after the COVID-19 pandemic. Can we hope to not only ward off another COVID-

like disaster but also eliminate all respiratory diseases, including the flu? Bill Gates, one of our greatest and most effective thinkers and activists, believes the answer is yes. The author of the #1 New York Times best seller *How to Avoid a Climate Disaster* lays out clearly and convincingly what the world should have learned from COVID-19 and what all of us can do to ward off another catastrophe like it. Relying on the shared knowledge of the world's foremost experts and on his own experience of

combating fatal diseases through the Gates Foundation, Gates first helps us understand the science of infectious diseases. Then he shows us how the nations of the world, working in conjunction with one another and with the private sector, how we can prevent a new pandemic from killing millions of people and devastating the global economy. Here is a clarion call—strong, comprehensive, and of the gravest importance. [Dating Dr. Dil](#) Simon and Schuster

Rupi Kaur performs the first-ever recording of the sun and her flowers, her second #1 New York Times bestselling collection of poetry and prose. This production was recorded in 2021 along with the brand-new audio edition of milk and honey and the debut audio recording of home body. Divided into five chapters, this volume is a journey through the life cycle of wilting, falling, rooting, rising, and blooming. It is a celebration of love in all its forms.

"Produced by members of the Centre for Imaginative Ethnography, this collection introduces the idea of an

imaginative and creative approach to anthropological inquiry, one that is collaborative, open-ended, embodied, affective, and experimental. Rather than structuring the book around traditional methods like interviewing, participant observation, and documentary research, the authors organize their thoughts around different methodologies--sensing, walking, writing, performing, and recording. As well, innovative, practical exercises are included that allow ethnographers to not just 'talk the talk', but also 'walk the walk' so they can deepen, complicate, and extend ethnographic inquiry. A list of additional resources at the end of each chapter provide rich support

for those who want to pursue more imaginative and creative methodologies."--

While LGBT populations often are combined as a single entity for research and advocacy purposes, each is a distinct population group with its own specific health needs. Furthermore, the experiences of LGBT individuals are not uniform and are shaped by factors of race, ethnicity, socioeconomic status, geographical location, and age, any of which can have an effect on health-related concerns and needs. The Health of Lesbian, Gay, Bisexual, and Transgender People assesses the state of science on the health status of LGBT populations, identifies research gaps and opportunities, and outlines a research agenda for the National Institute of Health. The report examines the health status of these populations in three life stages: childhood and adolescence, early/middle adulthood, and later adulthood. At each life stage, the committee studied mental health, physical health, risks and protective factors, health services, and contextual influences. To advance understanding of the health needs of all LGBT individuals, the report finds that researchers need more data about the demographics of these populations, improved methods for collecting and analyzing data, and an increased participation of sexual and gender minorities in research. The Health of Lesbian, Gay, Bisexual, and

Transgender People is a valuable resource for policymakers, federal agencies including the National Institute of Health (NIH), LGBT advocacy groups, clinicians, and service providers.

Award-winning photographer Matt Black traveled over 100,000 miles to chronicle the reality of today's unseen and forgotten America. When Magnum photographer Matt Black began exploring his hometown in California's rural Central Valley—dubbed "the other California," where one-third of the population lives in poverty—he knew what his next project had to be. Black was inspired to create a vivid portrait of an unknown America, to photograph some of the poorest communities across the US. Traveling across forty-six states and Puerto Rico, Black visited designated "poverty areas," places with a poverty rate above 20 percent, and found that poverty areas are so numerous that they're never more than a two-hour's drive apart, woven through the fabric of the country but cut off from "the land of opportunity."

American Geography is a visual record of this five-year, 100,000-mile road

trip, which chronicles the vulnerable conditions faced by America's poor. This compelling compilation of black-and-white photographs is accompanied by Black's own travelogue—a collection of observations, overheard conversations in cafe's and public transportation, diner menus, bus timetables, historical facts, and

snippets from daily news reports. A future classic of photography, this monograph is supported by an international touring exhibition and is a must-have for anyone with an interest in witnessing the reality of an America that's been excluded from the American Dream. Dr. Dil is what would happen if you put all my favorite romantic comedy tropes into a blender: a frothy, snarky, hilarious treat with a gooey, heartwarming center. The perfect addition to any rom-com lover's shelf." —Emily Henry, #1 New York Times bestselling author of *People We Meet on Vacation* Nisha Sharma's new romantic comedy features enemies to lovers, a cast of best friends, and a gaggle of aunties determined to make a match. Hi!

I'm Kareena Mann. As cheesy as it sounds, I'm looking for my soulmate. In four months. And he must gain the approval of my meddling aunties. Kareena dreams of having a perfect love story like her parents did. That's why on the morning of her thirtieth birthday, she's decided to suit up and enter the dating arena. When her widowed father announces he's retiring and selling their home after her sister's engagement party, Kareena makes a

deal with him. If she can find her soulmate by the date of the party, he'll gift her the house, and she'll be able to keep her mother's legacy alive. Hi, I'm Dr. Prem Verma, host of the Dr. Dil Show. Prem means love, Dil means heart, and I'm a cardiologist. Don't let my name fool you. I only fix broken hearts in the literal sense. Prem doesn't have time for romance, which is why it's no surprise when his first meeting with Kareena goes awry. Their second

encounter is worse when their on-air debate about love goes viral. Now Prem's largest community center donor is backing out because Prem's reputation as a heart-health expert is at risk. To get back in his donor's good graces, he needs to fix his image fast, and dating Kareena is his only option. Even though they have warring interests, the more time Prem spends with Kareena, the more he thinks she's might actually be the woman he wants to spend the

"There is a substantive body of research that indicates formative assessment can significantly improve student learning. Yet, this same

research shows that the features of formative assessment that impact student achievement are sadly missing from many classrooms (Black, et al., 2003). This book provides teachers with guidance and suggestions for using formative assessment to improve teaching and learning in the mathematics classroom, and identifies and describes practical techniques teachers

can use to build a rich repertoire of formative assessment strategies. The acronym, FACT, is used to label the techniques included in this book. FACT stands for Formative Assessment Classroom Technique. Through the varied use of FACTs, explicitly tied to a purpose for gathering information about or promoting students--thinking and learning, teachers can focus on

what works best for learning and design or modify lessons to fit the needs of the students"--

In the 1930s, the

Federal Writers' Project sent mostly anonymous writers, but also Zora Neale Hurston and Stetson Kennedy, into the depths of Florida to reveal its splendor to the world. The FWP and the State of Florida jointly published the results as *Florida: A Guide to the Southernmost State*, which included twenty-two driving tours of the state's main roads. Eventually, after

Eisenhower built the interstates, drivers bypassed the small towns that thrived along these roads in favor of making better time. Those main roads are now the state's backroads—forgotten by all but local residents, a few commuters, and dedicated road-trippers. Retracing the original routes in the Guide, Cathy Salustri rekindles our notions of

paradise by bringing a modern eye to the historic travelogues. Salustri's 5,000-mile road trip reveals a patchwork quilt of Florida cultures: startling pockets of history and environmental bliss stitched against the blight of strip malls and franchise restaurants. The journey begins on US 98, heading west toward the Florida/Alabama state line, where coastal

towns dot the roadway. Here, locals depend on the tourism industry, spurred by sugar sand beaches, as well as the abundance of local seafood. On US 41, Salustri takes us past the state's only whitewater rapids, a retired carnie town, and a dazzling array of springs, swamps, and rivers interspersed with farms that produce a bounty of fruit. Along US 17, she stops for milkshakes and hamburgers at Florida's oldest diner and visits a collection of springs interconnected by underwater mazes tumbling through white spongy limestone, before stopping in Arcadia, where men still bring cattle to auction. Desperately searching for skunk apes, the Sunshine State's version of Bigfoot, she encounters more than one gator on her way through the Everglades, Ochopee, and the Skunk Ape Research Headquarters. Following the original Guide, Salustri crisscrosses the state from the panhandle to the Keys. She guides readers through forgotten and unknown corners of the state--nude beaches, a rattlesnake cannery, Devil's Millhopper in Gainesville--as well

as more familiar haunts--Kennedy Space Center and The Villages, "Florida's Friendliest Retirement Hometown." Woven through these journeys are nuggets of history, environmental debates about Florida's future, and a narrative that combines humor with a strong affection for an oft-maligned state. Today, Salustri urges, tourists need a new

nudge to get off the interstates or away from Disney in order to discover the real Florida. Her travel narrative, following what are now backroads and scenic routes, guides armchair travelers and road warriors alike to historic sites, natural wonders, and notable man-made attractions--comparing the past views with the present landscape and commenting on the

changes, some barely noticeable, others extreme, along the way.

A spine-chilling saga of virulent racism,

human folly, and the ultimate triumph of scientific progress. For Chinese immigrant Wong Chut King, surviving in San Francisco meant a life in the shadows. His passing on March 6, 1900, would have been unremarkable if a city health officer hadn't noticed a swollen black lymph node on his groin—a sign of bubonic plague. Empowered by racist pseudoscience, officials rushed to quarantine Chinatown while doctors examined Wong's tissue for

telltale bacteria. If the devastating disease was not contained, San Francisco would become the American epicenter of an outbreak that had already claimed ten million lives worldwide. To local press, railroad barons, and elected officials, such a possibility was inconceivable—or inconvenient. As they mounted a cover-up to obscure the threat, ending the career of one of the most brilliant scientists in the nation in the process, it fell to

federal health officer Rupert Blue to save a city that refused to be rescued. Spearheading a relentless crusade for sanitation, Blue and his men patrolled the squalid streets of fast-growing San Francisco, examined gory black buboes, and dissected diseased rats that put the fate of the entire country at risk. In the tradition of Erik Larson and Steven Johnson, Randall spins a spellbinding account of Blue's race to understand the disease and contain its

spread—the only hope of saving San Francisco, and the nation, from a gruesome fate.

In 2006, Gotham City Video was among the last of its kind where, breathing in a cocktail of Pine-Sol and Windex, a man paid \$40 to watch a girl

strip naked behind glass. These fantasy lands, left over from the days when 42nd Street was the center of vice, eventually disappeared from the rapidly gentrifying city, their stories lost forever. Not those of tenderloin grinder, Sheila McCelar. Pulling back the curtain on the little-documented world of the peeps, her "ribald . . . memorable and highly relevant" (The Daily Beast) reflection is "both a eulogy and a paean to the freaks and misfits

who have long given their souls to the city" (Matthew Gallaway, author of *The Metropolis Case*). A late bloomer from small town Michigan, Sheila arrived in New York as a struggling actress and soon found herself adrift. Borderline homeless, and crashing with friends, she finally got steady work that paid the rent—as a stripper along the triple-x stretch of Eighth Avenue. When Times Square seeped into her blood, she ended up staying much longer than she imagined. The story she tells is not just of her own coming-of-age, it's a "sharp, sweetly personal . . . fascinating and honest" narrative of modern life on the fringes of society in New York City (Mark Jacobson, author of *Pale Horse Rider*).
