Healing the Fragmented Selves of Trauma Survivors integrates a neurobiologically informed understanding of trauma, dissociation, and attachment with a practical approach to treatment, all communicated in straightforward language accessible to both client and therapist. Readers will be exposed to a model that emphasizes "resolution"—a transformation in the relationship to one's self, replacing shame, self-loathing, and assumptions of guilt with compassionate acceptance. Its unique interventions have been adapted from a number of cutting-edge therapeutic approaches, including Sensorimotor Psychotherapy, Internal Family Systems, mindfulness-based therapies, and clinical hypnosis. Readers will close the pages of Healing the Fragmented Selves of Trauma Survivors with a solid grasp of therapeutic approaches to traumatic attachment, working with undiagnosed dissociative symptoms and disorders, integrating "right brain-to-right brain" treatment methods, and much more. Most of all, they will come away with tools for helping clients create an internal sense of safety and compassionate connection to even their most dis-owned selves.

VI. PERSONAL REQUIREMENTS. OUR goal in this chapter is Psychic Income. ' We define subjective (psychic) income as the stream of consciousness of any human being," remarks Professor Fisher. "All his conscious* life, from his birth to his death, constitutes his subjective income. Sensations, thoughts, feelings, volitions, and all psychical events, in fact, are a part of this income stream. All these conscious experiences which are desirable are positive items of income, or services; all which are undesirable are negative items, or disservices." The business man should keep two sets of books, one for the physical income, and one (in his self-observing mind) for the psychic income. The physical income of highest value is net; and the real income, psychically considered, is also net above all personal disqualifications. You are invited to study this chapter with the thought thus presented incessantly in mind. Remember the net psychic income! 1. In every phase of practical life certain personal requirements, in addition to the main considerations already given, become imperative if effort is to be crowned with success. These requirements concern body, dress, personal style, language, character, self-mastery, business conduct, and savings or increase of capital. 2. The factors enumerated represent, on the one hand, success-assets, but imply, on the other hand, all the handicaps of a lack of capital. If you were to capitalize yourself, so to speak, that is, try to ascertain your capital worth, or your income worth, the items would be (a) your static self, (b) the acting expression thereof through your dynamic self, which means simply the factors named above in Section 1, (c) your experience, with corresponding judgment...

This book focuses on the vulnerabilities of state and local services to cyber-threats and suggests possible protective action that might be taken against such threats. Cyber-threats to U.S. critical infrastructure are of growing concern to policymakers, managers and consumers. Information and communications technology (ICT) is ubiquitous and many ICT devices and other components are interdependent; therefore, disruption of one component may have a

negative, cascading effect on others. Cyber-attacks might include denial of service, theft or manipulation of data. Damage to critical infrastructure through a cyber-based attack could have a significant impact on the national security, the economy, and the livelihood and safety of many individual citizens. Traditionally cyber security has generally been viewed as being focused on higher level threats such as those against the internet or the Federal government. Little attention has been paid to cyber-security at the state and local level. However, these governmental units play a critical role in providing services to local residents and consequently are highly vulnerable to cyber-threats. The failure of these services, such as waste water collection and water supply, transportation, public safety, utility services, and communication services, would pose a great threat to the public. Featuring contributions from leading experts in the field, this volume is intended for state and local government officials and managers, state and Federal officials, academics, and public policy specialists.
