The City Record SAGE Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity

for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For

these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most

syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

Meet the challenges of high stakes testing in the practice of school psychology School psychologists can be a positive influence on how students, teachers, parents, schools, and communities cope with the challenges and opportunities associated with high stakes testing. Unfortunately, there has been a significant lack of literature to guide school psychologists and related school-based practitioners on this topic. High Stakes

Testing: New Challenges and Opportunities for School Psychology is a timely groundbreaking book that provides useful and thought-provoking information to help psychologists meet the challenges of high stakes testing and create new roles for themselves in helping children succeed. This book discusses practical ways to help provide academic support to facilitate student success on high stakes tests, reduce the impact of stress associated with high stakes testing, assess the data from the tests to improve programs, and take a leadership role in the appropriate use of the tests. The No Child Left Behind Act of 2001 (NCLB) and its accountability provisions has helped create and sustain a climate where student performance on state-created achievement tests often has high stakes implications for students, families, and schools. High Stakes Testing: New Challenges and Opportunities for School Psychology provides important background information about high stakes testing, including the legal, historical, and political context of high stakes testing, pertinent psychometrics, and a review of research on academic and non-academic outcomes as it relates to high stakes testing. Using this information as a foundation, the book then identifies new roles and opportunities for school psychologists with respect to high stakes testing. This book is comprehensively referenced. Topics in High Stakes Testing: New Challenges and Opportunities for School

Psychology include: advocating for the appropriate use of state-wide assessments the influence of item response theory (IRT) on the development of high stakes tests whether the accountability system of NCLB is truly improving student's learning the impact of high stakes tests on classroom instruction and student motivation strategies for helping students succeed on high stakes tests available resources to cope with the stress of high stakes testing and more High

Stakes Testing: New Challenges and Opportunities for School Psychology is a thought-provoking, horizon-expanding resource for school psychologists, public school educators, administrators, school counselors, curriculum coordinators, and special education teachers involved in organizing, administering, and preparing students to take high stakes tests.
