The African American Male School Adaptability Crisis (AMSAC) cannot be solved by the school alone. It is a race problem which can only be solved if we black males provide the leadership in tackling our three major demons which now mainly account for the problem: IQ lag-fatherless families-crime. AMSAC had its origin about 100 years ago when, after the death of Washington, DuBois gained ascendancy in our African American Garden of Eden and replaced Washingtons brains, property, and character gospel with a civil rights agenda. That agenda has led to a civil-rights fixation and our second bondage, Victimology, wherein being the victim has become part of our core identity and made us psychological slaves. Rather than being proud and self-reliant, disproportionately, we have come to see ourselves as victims who are entitled to system help and special treatment. This bondage and it is a bondage -- vitiates our manhood and the energy and drive required to pursue the adaptation pathway paved by Washington, but demonized by DuBois. Return to that pathway and we can confront and conquer AMSAC and our three major demons. Guided by history and the research evidence, this book details how. Its 20 chapters make for long reading, but, just by reading the first and last chapters, you can get the message. The motto of the proposed evidence-based experimental program, the African American Male Career Pathway Program (AMCAP). A special appeal is made to black athletes and entertainers to help propagate this motto and support the proposed high school student clubs (Student AMCAPs) in its implementation.

A revelatory and timely look at how technology boosts our cognitive abilities—making us smarter, more productive, and more creative than ever It ' s undeniable—technology is changing the way we think. But is it for the better? Amid a chorus of doomsayers, Clive Thompson delivers a resounding " yes. " In Smarter Than You Think, Thompson shows that every technological innovation—from the written word to the printing press to the telegraph—has provoked the very same anxieties that plague us today. We panic that life will never be the same, that our attentions are eroding, that culture is being trivialized. Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library (www.thecochranelibrary.com). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.

Recent rapid housing market expansion in China is presenting new challenges for policy makers, planners, business people, and citizens. Now that housing in middle-income China is driven by consumer choices and is no longer dominated by state policy decisions, housing policy issues in Chinese cities are becoming increasingly similar to those encountered in other global housing markets. With soaring prices and imbalances in housing supply favoring high income groups and housing demand driven by rising inequality in household incomes, many middle and lower-income households face worsening choices in terms of the quality and location of their housing as well as greater financial difficulties, which together can have negative implications for standards of public health. This book examines the impact of these changes on the general population, as well as on aspiring homeowners and developers. The contributors look at the effect on the widening of wealth gaps, slower economic growth, and threats to political and social stability. Though focusing on China, the editors also present discussions of specific policy design challenges encountered in Australia, Japan, Korea, the Netherlands, the Nordic countries, Singapore, Taiwan, the UK, and the US. This book would be of interest to housing policy makers, as well as academics who are studying the social and political effects of the Chinese housing market.
