The saxophone is arguably the most iconic of all instruments, but with its graceful form and soulful tone it's easy to forget that it's still a machine. It's a complicated machine, too, and even a slight fault in the mechanism can affect the way it feels and plays. This innovative manual explains clearly and simply how the mechanism functions and what can be done to

maintain it, as well as to improve its performance with professional set-up techniques, with few or no specialist tools. This manual is essential reading for everyone who plays the saxophone.

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For

Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated. Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna

Sciar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.
