"How did art critics come to speak of light and dark as, respectively, "high in value" and "low in value." In this book, Henry Sayre traces the origins of this usage in one of art history's most famous and racially charged paintings, Manet's Olympia. Masterfully researched and argued, this bold study reveals the extraordinary weight of history and politics that Manet's painting bears, and the presence of slavery at modernism's roots. Sayre shows that it was Émile Zola who introduced a new "law of values" to art criticism in an 1867 essay on Manet. Unpacking the intricate contexts of Zola's essay and of several related paintings of Manet, Sayre argues that Zola's use of the economic metaphor of "value" was doubly coded. On the one hand, it was a feint that deflected attention away from Olympia's actual subject and toward the painting's formal qualities. On the other, Sayre argues, "value" for Zola was a trope for the political economy of slavery and the Second Empire's complicity in the ongoing slave trade in the Americas. Value in Art is a surprising and necessary intervention in our understanding of modern art's emergence in relation to issues of race"--

First came video and more recently high definition home entertainment, through to the internet with its streaming videos and not strictly legal peer-to-peer capabilities. With so many sources available, today 's fan of horror and exploitation movies isn ' t necessarily educated on paths well-trodden — Universal classics, 1950s monster movies, Hammer — as once they were. They may not even be born and bred on DAWN OF THE DEAD. In fact, anyone with a bit of technical savvy (quickly becoming second nature for the born-clicking generation) may be viewing MYSTICS IN BALI and S.S. EXPERIMENT CAMP long before ever hearing of Bela Lugosi or watching a movie directed by Dario Argento. In this world, H.G. Lewis, so-called "godfather of gore," carries the same stripes as Alfred Hitchcock, "master of suspense." SPINEGRINDER is one man 's ambitious, exhaustive and utterly obsessive attempt to make sense of over a century of exploitation and cult cinema, of a sort that most critics won ' t care to write about. One opinion; 8,000 reviews (or thereabouts).

All women's magazines are not the same: content, outlook, and format combine to shape publications quite distinctively. While magazines in general have long been understood as a significant force in women's lives, many critiques have limited themselves to discussions of mainstream printed publications

that engage with narrowly stereotypical representations of femininity. Looking at a range of women's magazines (Cooperative Correspondence Club and Housewife) and magazine programmes (Woman's Hour and Houseparty), Magazine Movements not only extends our definition of a magazine, but most importantly, unearths the connections between women's cultures, specific magazines and the implied reader. The author first outlines the existing field of magazine studies, and analyzes the methodologies employed in accessing and assessing the cultural competence of magazines. Each chapter then provides a case study of a different kind of magazine: different in media form or style of presentation or audience connection, or all three. Forster not only extends our definition of a magazine, but most importantly, unearths the connections between women's cultures, specific magazines and the implied reader. In this way, fresh insights are provided into the long-standing importance of the magazine to the variety of feminisms on offer in Britain, from the mid twentieth century to the present day.

Annual Report to the President Springer

This book brings together a distinguished group of scholars from music, drama, poetry, performance art, religion, classics and philosophy to investigate the complex and developing interaction between performance and authenticity in the arts. The volume begins with a perspective on traditional understandings of that relation, examining the crucial role of performance in the Poetics, the marriage of art with religion, the experiences of religious and aesthetic authenticity, and modernist conceptions of authenticity. Several essays then consider music as a performative art. The final essays discuss the link of authenticity to sincerity and truth in poetry, explain how performance, as an authentic feature of poetry, embodies a collective effort, and culminate in a discussion of the dark
