See context and make connections across the humanities. The Humanities: Culture, Continuity and Change, now in a third edition, has become, in a very short period of time, the best selling Introduction to Humanities text on the market. With its message of “ see context and make connections across the humanities,” students enjoy countless “ ah-ha ” moments as they piece together the cultural history of world. Believing that students learn best by remembering stories rather than memorizing facts, author Henry Sayre employs a narrative storytelling approach to the humanities, deftly conveying multifaceted cultural experiences in a way that students can

understand and will remember – throughout the course and beyond. This third edition helps instructors and students by connecting the learning objectives in each chapter with MyArtsLab, an online learning program which brings the arts to life. Key learning tools within MyArtsLab include new listening guides for the musical selections, new Closer Look tours for every chapter entitled “ Continuing Presence of the Past ” , architectural panoramas and simulations to help students visualize key monuments and how they were built, and more! Teaching and Learning Experience This program will provide a better teaching and learning experience – for you and your students. It: Personalizes Learning with MyArtsLab: The new MyArtsLab delivers proven results in helping students succeed, and provides engaging experiences that personalize learning. Makes Connections and Shows Relevance: New Continuing Presence of the Past features help students to understand how cultural artifacts of the past have informed present works of art and culture. Emphasizes Critical Thinking: Chapter opening and ending questions encourage students to focus and think critically about the issues to come. Focuses on Contemporary Findings: The new third edition has been updated to reflect the

With a long history and deep connection to the Earth's resources, indigenous peoples have an intimate understanding and ability to observe the impacts linked to climate change. Traditional ecological knowledge and tribal experience play a key role in developing future scientific solutions for adaptation to the impacts. The book explores climate-related issues for indigenous communities in the United States, including loss of traditional knowledge, forests and ecosystems, food security and traditional foods, as well as water, Arctic sea ice loss, permafrost thaw and relocation. The book also highlights how tribal communities and programs are responding to the changing environments. Fifty authors from tribal communities, academia, government agencies and NGOs contributed to the book. Previously published in *Climatic Change*, Volume 120, Issue 3, 2013.

Sayre, literary scholar and art historian, demonstrates that Williams' work, heavily influenced by painters and photographers of the Stieglitz circle, is actually founded in the visual dimension of the printed word and must be approached as both graphic design and the representation of visual experience itself. He traces Williams' preoccupation with a visual order of poetry from his early work to the sophisticated replacement of painting by words in Paterson, Book Five and Pictures from Brueghel. Shows how Williams came to conceive of the poem as a visual order within which the disarray of the American scene could be composed. He advances a substantially new conception of Williams, forcing readers to reconsider their views. ISBN 0-252-01059-0 : \$12.95.

Why are there so few women scientists? Persisting differences between women's

and men's experiences in science make this question as relevant today as it ever was. This book sets out to answer this question, and to propose solutions for the future. Based on extensive research, it emphasizes that science is an intensely social activity. Despite the scientific ethos of universalism and inclusion, scientists and their institutions are not immune to the prejudices of society as a whole. By presenting women's experiences at all key career stages - from childhood to retirement - the authors reveal the hidden barriers, subtle exclusions and unwritten rules of the scientific workplace, and the effects, both professional and personal, that these have on the female scientist. This important book should be read by all scientists - both male and female - and sociologists, as well as women thinking of embarking on a scientific career.

"How did art critics come to speak of light and dark as, respectively, "high in value" and "low in value." In this book, Henry Sayre traces the origins of this usage in one of art history's most famous and racially charged paintings, Manet's Olympia. Masterfully researched and argued, this bold study reveals the extraordinary weight of history and politics that Manet's painting bears, and the presence of slavery at modernism's roots. Sayre shows that it was Émile Zola

who introduced a new "law of values" to art criticism in an 1867 essay on Manet. Unpacking the intricate contexts of Zola's essay and of several related paintings of Manet, Sayre argues that Zola's use of the economic metaphor of "value" was doubly coded. On the one hand, it was a feint that deflected attention away from Olympia's actual subject and toward the painting's formal qualities. On the other, Sayre argues, "value" for Zola was a trope for the political economy of slavery and the Second Empire's complicity in the ongoing slave trade in the Americas. Value in Art is a surprising and necessary intervention in our understanding of modern art's emergence in relation to issues of race"--

How has our relation to energy changed over time? What differences do particular energy sources make to human values, politics, and imagination? How have transitions from one energy source to another—from wood to coal, or from oil to solar to whatever comes next—transformed culture and society? What are the implications of uneven access to energy in the past, present, and future? Which concepts and theories clarify our relation to energy, and which just get in the way? Fueling Culture offers a compendium of keywords written by scholars and practitioners from around the world and across the humanities and social sciences. These keywords offer new ways of thinking about energy as both the source and the limit of how we inhabit culture, with the aim of opening up new ways of understanding the seemingly irresolvable contradictions of dependence upon unsustainable energy forms. Fueling Culture brings together writing that is risk-taking and interdisciplinary, drawing on insights from literary and cultural studies, environmental history and ecocriticism, political economy and political ecology, postcolonial and globalization studies, and materialisms old and new. Keywords in this volume include: Aboriginal, Accumulation, Addiction, Affect, America, Animal, Anthropocene, Architecture, Arctic, Automobile, Boom, Canada, Catastrophe, Change, Charcoal, China, Coal, Community, Corporation, Crisis, Dams, Demand, Detritus,

This volume explores the multiple connections between the two most canonical authors in English, Jane Austen and William Shakespeare. The collection reflects on the historical, literary, critical and filmic links between the authors and their fates. Considering the implications of the popular cult of Austen and Shakespeare, the essays are interdisciplinary and comparative: ranging from Austen ' s and Shakespeare ' s biographies to their presence in the modern vampire saga *Twilight*, passing by Shakespearean echoes in Austen ' s novels and the authors ' afterlives on the improv stage, in wartime cinema, modern biopics and crime fiction. The volume concludes with an account of the Exhibition “ *Will & Jane* ” at the Folger Shakespeare Library, which literally brought the two authors together in the autumn of 2016. Collectively, the essays mark and celebrate what we have called the long-standing “ love affair ” between William Shakespeare and Jane Austen—over 200 years and counting.
