Literary data is supposed to reflect real life situations and is at the same time written in a style of writing that is considered as highly elevated. Such reasons have prompted the contributors to this book to deal with this type of data. Such attempts range from semantics to stylistics and pragmatics. This book introduces linguistic analyses of literary data from different points of view. This involves dealing with various linguistic topics and different types

of literary data. Hence, many models are presented to analyze the linguistic aspects of those topics in the light of the genre in which those topics are undertaken.

Accordingly, different results are yielded from those analyses and this makes each type of analysis distinct from the other ones. It is hoped that this work will be a useful source to all those – whether theoretically, practically, or both – interested in linguistics, pragmatics of literature, applied linguistics and literary stylistics.

*In Strategic Maneuvering in Argumentative Discourse*, Frans H. van Eemeren brings together the dialectical and the rhetorical dimensions of argumentation by introducing the concept of strategic maneuvering. Strategic maneuvering refers to the arguer's continual efforts to reconcile aiming for effectiveness with being reasonable. It takes place in all stages of argumentative discourse and manifests itself simultaneously in the choices that are made from the topical potential available at a particular stage, in adaptation to audience demand, and in the use of specific presentational devices. Strategic

---

maneuvering derails when in the specific context in which the discourse takes place a rule for critical discussion has been violated, so that a fallacy has been committed. Van Eemeren makes clear that extending the pragma-dialectical approach to argumentation by taking account of strategic maneuvering leads to a richer and more precise method for analyzing and evaluating argumentative discourse.

Persuasion, in its various linguistic forms, enters our lives daily. Politicians and the news media attempt to change or confirm our beliefs, while advertisers try to bend our tastes toward buying their products.

Persuasion goes on in courtrooms, universities, and the business world.

Persuasion pervades interpersonal relations in all social spheres, public and private. And persuasion reaches us via a large number of genres and their intricate interplay. This volume brings together nine chapters which investigate some of the typical genres of modern persuasion. Using both quantitative and

qualitative methods, the authors explore the linguistic features of successful (and unsuccessful) persuasion and the reasons for the variation of persuasive choices as realized in various genres: business negotiations, judicial argumentation, political speech, advertising, newspaper editorials, and news writing. In the final chapter, the editors tie together the two themes persuasion and genres by proposing an Intergenre Model. This model assumes that a powerful force behind generic evolution is the perennial need for implicit persuasion."

In today's increasingly polarized political landscape it seems that fewer and fewer citizens hold out hope of persuading one another. Even among those who have not given up on persuasion, few will admit to practicing the art of persuasion known as rhetoric. To describe political speech as "rhetoric" today is to accuse it of being superficial or manipulative. In *Saving Persuasion*, Bryan Garsten uncovers the early modern origins of this suspicious attitude toward rhetoric and seeks to loosen its grip on contemporary political theory. Revealing how deeply concerns about rhetorical speech shaped both ancient and modern political thought, he argues that the artful practice of persuasion ought to be viewed as a crucial part of democratic politics. He provocatively suggests that the aspects of rhetoric that seem most dangerous--the appeals to emotion, religious values, and the concrete commitments and identities of particular communities--are also those which can draw out citizens' capacity for good judgment. Against theorists who advocate

---

a rationalized ideal of deliberation aimed at consensus, Garsten argues that a controversial politics of partiality and passion can produce a more engaged and more deliberative kind of democratic discourse.

Running IPv6 explains how to install and operate the IPv6 protocol for Windows XP, Mac OS X, FreeBSD, Red Hat Linux, and Cisco routers. The book also covers DNS and BIND, Zebra, Apache 2, and Sendmail. While IPv4 uses 32-bit addresses, IPv6 addresses are 128 bits long, and allow for more unique addresses. While the adoption of IPv6 won't

be immediate, it is necessary. Running IPv6 compares and contrasts IPv6 to IPv4, and discusses the advantages and disadvantages of each. Because most major software and hardware vendors have adopted IPv6, the focus of this book is to leverage your existing knowledge of IPv4 and to help you apply that knowledge to the newer protocol.

The first well-researched contrastive pragmatic analysis of requests and apologies in British English and Uruguayan

Spanish. It takes the form of a cross-cultural corpus-based analysis using male and female native speakers of each language and systematically alternating the same social variables in both cultures. The data are elicited from a non-prescriptive open role-play yielding requests and apologies. The analysis of the speech acts is based on an adaptation of the categorical scheme developed by Blum-Kulka et al. (1989). The results show that speakers of English and Spanish differ in their choice of (in)directness levels, head-act modifications, and the politeness types of males and females in both cultures. Reference to an extensive bibliography and the thorough discussion of methodological issues concerning speech act studies deserve the attention of students of pragmatics as well as readers interested in cultural matters.
