INTERNATIONAL BEST SELLER •

WINNER OF SPAIN ' S BIGGEST

LITERARY PRIZE • The first book in the acclaimed series: Barcelona detective Melchor Mar í n is sent to the countryside to investigate a horrific double murder. Before long, it becomes clear that nothing about the case is quite as it seems. Melchor, the son of a prostitute, went to prison as a teenager, convicted of working for a Colombian drug cartel. Behind bars, he read a book that changed his life: Les Mis é rables. Then his mother was murdered. He decided to become a cop. This new case, in Terra Alta, a remote region of rural Catalonia—the murder of a wealthy local man and his wife—will turn Melchor ' s life upside down yet again. Even the Darkest Night is a thought-provoking, elegantly constructed thriller about justice,

revenge, and, above all, the struggles of a righteous man trying to find his place in a corrupt world.

India Today Juta Academic

In spite of all the assistance offered by electronic control systems, the latest generation of passenger car chassis still relies on conventional chassis elements. With a view towards driving dynamics, this book examines these conventional elements and their interaction with mechatronic systems. First, it describes the fundamentals and design of the chassis and goes on to examine driving dynamics with a particularly practical focus. This is followed by a detailed description and explanation of the modern components. A separate section is devoted to the axles and processes for axle development. With its revised illustrations and several updates in the text and

list of references, this new edition already includes a number of improvements over the first edition.

Lodusky Knopf

Governments of many countries consider the electrification of individual passenger transport as a suitable strategy to decrease oil dependency and reduce transport-related carbon dioxide (CO₂) and air pollutant emissions. However, battery-electric vehicles (BEVs) and plug-in hybrid-electric vehicles (PHEVs) have been more expensive than their conventional

counterparts and suffer from relatively short electric driving ranges, which still hampers the market potential of these vehicles. Despite persisting shortfalls, mechanisms such as technological learning and economics of scale promise to improve the techno-economic performance of BEVs and PHEVs in the short- to mid-term. Here, the author seeks to obtain insight into the techno-economic prospects of BEVs and PHEVs by: (i) establishing experience curves and (ii) quantifying user costs and the costs of mitigating carbon dioxide and air pollutant emissions in a time-series analysis. The analysis captures the situation in Germany between 2010 and 2016.

The spotlight shines on Top Cow founder Marc Silvestri in this very special art collection. Silvestri's career blossomed during runs on Uncanny X-Men and Wolverine and in the early 1990s, he revolutionized the comics industry when he co-founded Image Comics and created such hit properties as Cyberforce, Witchblade, and The Darkness. This oversized art book, offered now in

softcover, showcases some of Silvestri's favorite, most popular, and most iconic images from his illustrious career.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Hot, Cold, Heavy, Light, 100 Art Writings 1988-2018 Haynes Publishing Group

The value of the groceries purchases in the USA is over

\$500 billion annually, most of which is accounted for by packaged foods. Plastic packaging of foods is not only ubiquitous in developed economies, but increasingly commonplace in the developing world, where plastic packaging is instrumental in decreasing the proportion of the food supply lost to spoilage. This new handbook is a combination of new material and updated chapters, chosen by Dr. Sina Ebnesajjad, from recently published books on this subject. Plastic Films in Food Packaging offers a practical

handbook for engineers, scientists and managers working in the food packaging industry, providing a tailor-made package of science and engineering fundamentals, best practice techniques and guidance on new and emerging technologies. By covering materials, design, packaging processes, machinery and waste management together in one book, the authors enable the reader to take a lifecycle approach to food packaging. The Handbook addresses questions related to film grades, types of packages for different types of foods, packaging technologies, machinery and waste management. Additionally the book provides a review of new and emerging technologies. Two chapters cover the development of barrier films for food packaging and the regulatory and safety aspects of food packaging. Essential information and practical guidance for engineers and scientists working at all stages of the food packaging lifecycle: from design through manufacture to recycling. Includes key published

material on plastic films in food packaging, updated specifically for this Handbook, and new material on the regulatory framework and safety aspects Coverage of materials and applications together in one handbook enables engineers and scientists to make informed design and manufacturing decisions

100 key writings from spanning across thirty years of the acclaimed New Yorker art critic's career. Hot, Cold, Heavy, Light collects

100 key writings by Peter Schjeldahl spinning thirty years, his last twenty as the art critic of the New Yorker. In this unfailingly lucid guide to an art world in constant, dramatic flux, Schjeldahl addresses new artists and Old Masters with the same pitch of acuity, empathy, and wit. No other writer enhances the reader's experience of art in precise, jargon-free prose as he does, with reviews that are as much essay as criticism. Implicit in Schjeldahl's role as a frontline critic is a focus on

artists, issues, and events of and consequence of art today. urgent relevance to the culture at large. Holt, Cold, Heavy, Light tells us why we still care about Rembrandt and Mantegna, Matisse and Picasso; takes the measure of contemporaries Basquiat and Holzer, Polke and Kiefer, Sherman and Koons; introduces us to newcomers Kerry James Marshall and Laura Owens; and salutes rediscoveries of Florine Stettheimer, Hélio Oiticica, and Peter Hujar. The book provides essential knowledge to anyone curious about the character, quality,

The pieces in Hot, Cold, Heavy, Light were compiled and arranged by the critic Jarrett Earnest, with an ear attuned to Schjeldahl's range of voices. "The effect of reading him in depth, over time," Earnest says in his introduction, "is like that of great literature. You come away not only with new insights and ideas, but with a feeling of having been granted an extra life." "This is a rapturous read for art lovers and all who appreciate dynamic critical essays," —Booklist

"Bruce is no longer The Boss; Peter Schjeldahl is! Hot, Cold, Heavy, Light is the apex of artistic criticism and commentary," –Steve Martin
"The great New Yorker art critic writes like an angel about everyone from Vermeer to Picasso, Donatello to Andy Warhol, in beautiful, enjoyable, accessible essays across 30 years,"

(Includes maps) From September
1943, when Allied troops came
ashore near Salerno, until
German surrender in May 1945,
312,000 Allied soldiers were
killed, wounded, or missing in
Italy. Was a campaign that from
the first faced the bleak

prospect of coming to a dead end
against the forbidding
escarpment of the Alps worth
that cost? Was the objective of
tying down German troops to
avoid their commitment in
northwestern Europe all that the
campaign might have
accomplished? The answers to
those questions have long been
sought but, as is the nature of
history, must forever remain
conjecture. What is established
bet, as this volume makes clear,
is the tenacity and intrepidity
displayed by American and Allied
soldiers in the face of a
determined and resourceful
enemy, harsh weather, sharply

convoluted terrain, limited numbers, and indefinite goals in what many of them must have looked upon as a backwater of the war. This volume relates the story of the last year of their struggle. Three volumes previously published tell of the campaign in northwest Africa, the conquest of Sicily and covert politico-military negotiations leading to surrender of the Italian armed forces, and the campaign from the Allied landings on the mainland through the bitter disappointment of the amphibious assault at Anzio. This volume is thus the capstone of a four-

volume series dealing with American military operations in the western Mediterranean.
