Major Motion Picture based on Dark Alliance and starring Jeremy Renner, "Kill the Messenger," to be released in Fall 2014 In August 1996, Pulitzer Prize-winning journalist Gary Webb stunned the world with a series of articles in the San Jose Mercury News reporting the results of his year-long investigation into the roots of the crack cocaine epidemic in America, specifically in Los Angeles. The series, titled “Dark Alliance,” revealed that for the better part of a decade, a Bay Area drug ring sold tons of cocaine to Los Angeles street gangs and funneled millions in drug profits to the CIA-backed Nicaraguan Contras. Gary Webb pushed his investigation even further in his book, Dark Alliance: The CIA, The Contras, and the Crack Cocaine Explosion. Drawing from then newly declassified documents, undercover DEA audio and videotapes that had never been publicly released, federal court testimony, and interviews, Webb demonstrates how our government knowingly allowed massive amounts of drugs and money to change hands at the expense of our communities. Webb's own stranger-than-fiction experience is also woven into the book. His excoriation by the media—not because of any wrongdoing on his part, but by an insidious process of innuendo and suggestion that in effect blamed Webb for the implications of the story—had been all but predicted. Webb was warned off doing a CIA expose by a former Associated Press journalist who lost his job when, years before, he had stumbled onto the germ of the “Dark Alliance” story. And though Internal investigations by both the CIA and the Justice Department eventually vindicated Webb, he had by then been pushed out of the Mercury News and gone to work for the California State Legislature Task Force on Government Oversight. He died in 2004.

Due to its inherent characteristics, mercury contamination from gold mining is a major environmental problem compared to past mercury contamination from industrial point sources. The worsening of social-economical conditions and increasing gold prices in the late 1970s resulted in a new rush for gold by individual entrepreneurs for whom Hg amalgamation is a cheap and easily carried out operation. Even after the present-day mining areas are exhausted, the mercury left behind will remain part of the biochemical cycle of the tropical forest. This book reviews the current information on mercury from gold mining, its cycling in the environment and its long-term ecotoxicological impact. The book is illustrated with numerous diagrams and photographs.

It is often said that the “dosage” of any substance determines its remedy or poison effect. Heavy metal sources encompass sewage, pesticides, fertilizers, environmental contamination, occupational exposure/contact through inhalation, ingestion, and skin. Before the advent of technology/the industrial revolution, communicable diseases ravaged the human race but this seems to have given way to non-communicable diseases such as cancers, renal failure, hormonal distortion enzymes, inhibition of fetal growth, and DNA damage causing negative health issues due to heavy metals. This book brings to the fore probably the most recent experimental research/review on heavy metal contamination, remediating techniques, cellular tissue damage, and toxicological and antioxidant effects of heavy metals. It is hoped that its contents will make interesting reading for all.  
The Typewriter Revolution: A Typist's Companion for the 21st Century CRC Press

The connoisseur's guide to the typewriter, entertaining and practical What do thousands of kids, makers, poets, artists, steampunks, hipsters, activists, and musicians have in common? They love typewriters—the magical, mechanical contraptions that are enjoying a surprising second life in the 21st century, striking a blow for self-reliance, privacy, and coherence against dependency, surveillance, and disintegration. The Typewriter Revolution documents the movement and provides practical advice on how to choose a typewriter, how to care for it, and what to do with it—from National Novel Writing Month to letter-writing socials, from type-ins to typewritten blogs, from custom-painted typewriters to typewriter tattoos. It celebrates the unique quality of everything typewriter, fully-illustrated with vintage photographs, postcards, manuals, and more.

This newly reissued debut book in the Rutgers University Press Classics Imprint is the story of the search for a rocket propellant which could be trusted to take man into space. This search was a hazardous enterprise carried out by rival labs who worked against the known laws of nature, with no guarantee of success or safety. Acclaimed scientist and sci-fi author John Drury Clark writes with irreverent and eyewitness immediacy about the development of the explosive fuels strong enough to negate the relentless restraints of gravity. The resulting volume is as much a memoir as a work of history, sharing a behind-the-scenes view of an enterprise which eventually took men to the moon, missiles to the planets, and satellites to outer space. A classic work in the history of science, and described as “a good book on rocket stuff...that’s a really fun one” by SpaceX founder Elon Musk, readers will want to get their hands on this influential classic, available for the first time in decades.

In *The Fifth Sacred Thing*, readers fell in love with Maya Greenwood, the 98-year-old writer who led Northern California's successful 21st century rebellion against a racist, totalitarian regime of the South. Walking to Mercury takes readers back to the 20th century and powerfully dramatizes the forces that shaped this extraordinary woman. The book opens and closes with the middle-aged Maya struggling with a profound personal and spiritual crisis. The culminating factor has been her mother's death, and now Maya embarks on a trek in the Himalayas, intending to sprinkle her mother's ashes at the base of Mt. Everest and finally lay to rest her tumultuous past. At rest stops in tiny Tibetan villages, she reads diary pages her lover Johanna has tucked into her bag—the diary Johanna kept throughout their shared youth during the Vietnam era. In vivid flashbacks to those radical days, we accompany the young Maya as she awakens to the summer of love, joins the anti-war movement, and enters into a relationship with the abusive, alcoholic Rio. She finally gathers the strength to break free and seek her own true path, which takes her from the streets of Manhattan to the mountains of Mexico. Eventually she emerges, stronger and wiser, infused with the wisdom of the earth and the spirit of the goddess. Traveling through the landscape of memories helps Maya reclaim her past and foreshadows the miraculous events readers of *The Fifth Sacred Thing* know her to be capable of in the future.
