There are many books about Triumph, but most of them concentrate on the glamorous twin-carburettor Bonneville and three-cylinder Trident. Alongside these headline grabbing bikes, Triumph built a whole series of single-carb machines that had all the style of their twin-carb cousins, but were not much slower, delivered better fuel consumption, and were easier to live with. Unlike the many books about Triumph 's history, this one is a straightforward, practical guide to buying a Trophy or Tiger secondhand. In the Veloce Essential Buyer 's Guide format, it delves into what these bikes are like to live with, and the values, advantages, and disadvantages of different models. Plus, of course, what to look for when buying one - including engine, transmission, frame, brakes, suspension, paint, chrome, and more.

This is a complete and practical guide which highlights the authors' new strategic approaches to selling when the buyer initially declines or is resistant on a sales opportunity. Hopkins and Katt explain that most sales reps take a traditional linear approach to selling, but that the trick in closing is in taking a more creative and circular approach. That's the key. It all starts with how the buyer initially says, "No." Too many sales reps don't pay close attention as to how that's presented. Hopkins and Katt point out that "no" may suggest all sorts of other options -- avenues that can eventually lead to the buyer actually saying yes. The authors introduce a novel concept called the Circle of Persuasion which offers sales reps a new approach in this potentially tricky process. Along the way, WHEN BUYERS SAY NO details prescriptive steps and even sample dialogues that will instruct and guide sales professionals on how to best cultivate buyer-seller relationships. There's particular emphasis on how to establish the kind of rapport that ultimately leads to a successful close.

Eighteen million Vespas have buzzed their way into the world since 1946. Stood end to end, they would form a line measuring 32,000 kilometres - 20,000 miles - in length. This is an almost inconceivable statistic, as with many things that transcend conventional measures and at some point achieve cult status. How did the little machine come so far? The answer is simple. The Vespa has always remained the Vespa, true to itself, and has what others lack: real character! This book tells the Vespa's story via over 470 photos, corrects many misconceptions and lets the reader become immersed in the culture of Vespa and la bella vita.
