Each topic is treated from the
beginning, without assuming prior
knowledge. Each chapter starts with an
opening section covering an
application. These help students to

understand the relevance of the topic: they are motivational and they make the text more accessible to the majority of students. Concept Maps have been added, which together with Summaries throughout, aid understanding of main ideas and connections between topics. Margin points highlight key points, making the text more accessible for learning and revision. Checkpoints in each chapter test students' understanding and support their private study. A selection of questions are included at the end of each chapter, many from past examination papers. Suggested answers are provided in the Answers Key.

This book includes Monday to Friday lessons for each day of a 36-week school year and short daily lessons. The Monday to Thursday lessons include two sentences to edit, including corrections in punctuation, capitalization, spelling, grammar, and vocabulary and three items practicing a variety of language and reading skills. Friday practice cycles through five formats: language usage, identifying and correcting mistakes, combining sentences, choosing reference materials and figurative speech (similes, metaphors). The pages are reproducible and the book includes a skills list and answer keys.

NEW YORK TIMES BESTSELLER • Once in
a great while, a book comes along that
changes our view of the world. This
magnificent novel from the Nobel laureate and
author of *Never Let Me Go* is “an intriguing
take on how artificial intelligence might play a
role in our futures ... a poignant meditation on
love and loneliness” (The Associated Press).

• **A GOOD MORNING AMERICA Book Club**
Pick! Here is the story of Klara, an Artificial
Friend with outstanding observational qualities,
who, from her place in the store, watches
carefully the behavior of those who come in to
browse, and of those who pass on the street
outside. She remains hopeful that a customer
will soon choose her. *Klara and the Sun* is a
thrilling book that offers a look at our changing
world through the eyes of an unforgettable
narrator, and one that explores the
fundamental question: what does it mean to
love?

A-level Chemistry Nelson Thornes

Since the financial crisis of 2008, the major
governments of the world have resorted to
printing large amounts of money to pay
national debts and bail out banks. The
warning signs are clear, and the collapse of
the Zimbabwean dollar after years of rampant
money printing is a frightening example of
what lies in store for world economies if
painful reform is not executed. *When Money
Destroys Nations* tells the gripping story of the
disintegration of the once-thriving
Zimbabwean economy and how ordinary
people survived in turbulent circumstances.
Analysing this case within a global context,
Philip Haslam and Russell Lamberti
investigate the causes of hyperinflation and
draw ominous parallels between Zimbabwe
and the world's developed economies. The
looming currency crises and hyperinflation in

these major economies, particularly the United
States, have the potential to turn the current
world order upside down. This story of how
money destroys nations holds lessons that
cannot be ignored.
