The report presents the latest assessment of global trends in wildlife crime. It includes discussions on illicit rosewood, ivory, rhino horn, pangolin scales, live reptiles, tigers and other big cats, and European eel. The COVID-19 (coronavirus) pandemic has highlighted that wildlife crime is a threat not only to the environment and biodiversity, but also to human health, economic development and security. Zoonotic diseases - those caused by pathogens that spread from animals to humans - represent up to 75% of all emerging infectious diseases. Trafficked wild species and the resulting products offered for human consumption, by definition, escape any hygiene or sanitary control, and therefore pose even greater risks of infection.

Pros and Cons: A Debaters Handbook offers a unique and invaluable guide to the arguments both for and against over 140 current controversies and global issues. Since it was first published in 1896 the handbook has been regularly updated and this nineteenth edition includes new entries on topics such as the right to possess nuclear weapons, the bailing out of failing industries, the protection of indigenous languages and the torture of suspected terrorists. Equal coverage is given to both sides of each debate in a dual column format which allows for easy comparison. Each entry also includes a list of related topics and suggestions for possible motions. The introductory essay describes debating technique, covering the rules, structure and type of debate, and offering tips on how to become a successful speaker. The book is then divided into eight thematic sections, where specific subjects are covered individually.

A History of England Alpha Edition

Rereading the historical record indicates that it is no longer so easy to argue that history is simply prior to its forms. Since the mid-1990s a new wave of research has formed around wider debates in the humanities and social sciences, such as decentering the subject, new analytics of power, reconsideration of one-dimensional time and three-dimensional space, attention to beyond-archival sources, alterity, Otherness, the invisible, and more. In addition, broader and contradictory impulses around the question of the nation - transnational, post-national, proto-national, and neo-national movements—have unearthed a new series of problematics and focused scholarly attention on traveling

discourses, national imaginaries, and less formal processes of socialization, bonding, and subjectification. New Curriculum History challenges prior occlusions in the field, building upon and departing from previous waves of scholarship, extending the focus beyond the insularity of public schooling, the traditional framework of the self-contained nation-state, and the psychology of the schooled individual. Drawing on global studies, historical sociology, postcolonial studies, critical race theory, visual culture theory, disability studies, psychoanalytics, Cambridge school structuralisms, poststructuralisms, and infra- and transnational approaches the volume holds together not despite but because of differences and incommensurabilities in rereading historical records.

¡ Hola! Hello! Did you understand this first Spanish word? Yes, you did! Why? Because it was presented to you using a new technique that is making learning languages easier than ever – the Bilingual Reading. We created this book using this technique so that you can learn Spanish in a fast and fun way and whenever you want. How does this work? It is simple: Bilingual Reading works by reading two versions of the same book or text at once. One version will be on the language you want to learn (in this case we will help you to learn Spanish) and the other version will be in your native language or some other language you are comfortable with – here we will use English. Using this method, you will quickly start discovering the meaning of the words in Spanish and accumulating vocabulary that will soon allow you to read texts that are more complex without having to spend hours and hours looking for every word meaning on a dictionary and trying hard to memorize it. In order to make it easier for you to learn Spanish in a fun

way, we gathered in a word a very special group of 12 Spanish short stories. These 12 Spanish short stories for beginners were written using straightforward grammar that is comprehensible for beginners and that will help you rapidly gain more Spanish vocabulary and comprehension. Using Spanish English parallel text, this book will increase your bilingual reading comprehension skills and maximize the time you invest in reading. The book is organized as a Spanish learning book: you can start by reading each paragraph of each story in the two languages (in Spanish English parallel text), then move to read the full story in each language, rereading to consolidate the Spanish fundamentals whenever is necessary. This way you will feel the progress of Spanish language learning when moving from story to story and see your Spanish vocabulary grow as your bilingual reading comprehension increases - allows you to learn Spanish easily and more than that, you can learn Spanish in a fast and fun way. You can even dedicate it a few moments every day so you can even learn Spanish in 10 minutes a day if you want! Let ' s Start? The Volume 2 is also available! Get it also to learn even more words in Spanish, with 10 new short stories!

Trends in Geography: An Introductory Survey reviews trends in geography, including physical geography, human geography, and applied geography. Topics covered include progress in geomorphology, meteorology, climatology, hydrology, historical geography, transport geography, and industrial geography, along with the geography of rural settlements and the ecology of agricultural systems. The importance of geography in area studies is also discussed. This book is comprised of 26 chapters and begins by tracing developments in the field of geography, followed by a discussion on the study of soils in geography and the economic geography of agriculture. The following chapters explore the diversity of urban geography; the role of geography in physical planning and economic planning; planning studies in rural areas; and geographical research on local government. A cultural and historical perspective in area studies is presented by citing the case of Latin America. The final chapter is devoted to geographical studies of developing areas, focusing on the case of tropical Africa. This monograph will be of interest to teachers, students, and practitioners of geography.

This extensively revised, restructured, and updated edition continues to present an engaging and comprehensive introduction to the subject, exploring the world's landforms from a broad systems perspective. It covers the basics of Earth surface forms and processes, while reflecting on the latest developments in the field. Fundamentals of Geomorphology begins with a consideration of the nature of geomorphology, process and form, history, and geomorphic systems, and moves on to discuss: structure: structural landforms associated with plate tectonics and those associated with volcanoes, impact craters, and

fold, faults, and joints process and form: landforms resulting from, or influenced by, the exogenic agencies of weathering, running water, flowing ice and meltwater, ground ice and frost, the wind, and the sea; landforms developed on limestone; and landscape evolution, a discussion of ancient landforms, including palaeosurfaces, stagnant landscape features, and evolutionary aspects of landscape change. This third edition has been fully updated to include a clearer initial explanation of the nature of geomorphology, of land surface process and form, and of land-surface change over different timescales. The text has been restructured to incorporate information on geomorphic materials and processes at more suitable points in the book. Finally, historical geomorphology has been integrated throughout the text to reflect the importance of history in all aspects of geomorphology. Fundamentals of Geomorphology provides a stimulating and innovative perspective on the key topics and debates within the field of geomorphology. Written in an accessible and lively manner, it includes guides to further reading, chapter summaries, and an extensive glossary of key terms. The book is also illustrated throughout with over 200 informative diagrams and attractive photographs, all in colour.

This retrospective offers a first hand account on internal conflicts in ZANU during the 1970s, which resulted in the defeat of its left wing. Chung's narratives include her experiences in two guerrilla camps. She recalls her encounters with the charismatic Josiah Tongogara, a legendary military commander during Zimbabwe's liberation war (known as the second chimurenga), who died at the threshold to Independence. The personal recollection of a transition to national sovereignty concludes with an incisive analysis of developments after Independence. It ends with Chung's vision for the Zimbabwe of the future. Fay Chung served within the Ministry of Education in post-colonial Zimbabwe for a total of fourteen years, at the end as the Minister of Education and Culture. Her autobiographical account has the childhood experiences in colonial Rhodesia as a point of departure. Like many other Zimbabwean intellectuals she joined the liberation struggle. From the mid-1970s she worked within the ZANU-organised educational sphere.
