An archaeologist and chef explains how to follow our ancestors' lead when it comes to dietary choices and cooking techniques for optimum health and vitality. "Read this book!" (Mark Hyman, MD, author of Food) Our relationship with food is filled with confusion

and insecurity. Vegan or carnivore? Vegetarian or gluten-free? Keto or Mediterranean? Fasting or Paleo? Every day we hear about a new ingredient that is good or bad, a new diet that promises everything. But the secret to becoming healthier, losing weight, living an energetic life, and healing the planet has nothing to do with counting calories or feeling deprived—the key is re-learning how to eat like a human. This means finding food that is as nutrient-dense as possible, and preparing that food using methods that release those nutrients and make them bioavailable to our bodies, which is exactly what allowed our ancestors to not only live but thrive. In *Eat Like a Human*, archaeologist and chef Dr. Bill Schindler draws on cutting-edge science and a lifetime of research to explain how nutrient density and bioavailability are the cornerstones of a healthy diet. He shows readers how to live like modern “hunter-gatherers” by using the same strategies our ancestors used—as well as techniques still practiced by many cultures around the world—to make food as safe, nutritious, bioavailable, and delicious as possible. With each chapter dedicated to a specific food group, in-depth explanations of different foods and cooking techniques, and concrete takeaways, as well as 75+ recipes, *Eat Like a Human* will permanently change the

way you think about food, and help you live a happier, healthier, and more connected life.

A cancer-related checkup is recommended every 3 years for people aged 20 to 40 and every year for people aged 40 or older. This exam should include health counseling and, depending on a person's age and gender, might include examinations for cancers of

the thyroid, oral cavity, skin, lymph nodes, testes, or ovaries, as well as for some nonmalignant diseases. A high dietary intake of vitamin C has been shown to significantly reduce the risk of death from heart attacks and strokes, as well as all other causes including cancer. Many clinical and experimental studies have clearly demonstrated that stress, personality, attitude, and emotion are etiologic or contributory in suppressing the immune system as well as leading to the development of many diverse diseases. Regular exercise has been demonstrated to provide benefit to individuals with immunodeficiency diseases, particularly through stress alleviation and mood enhancement. HIV-positive individuals had increases in CD4, CD8, and natural killer (NK) cells immediately following aerobic exercise. Melatonin exerts significant anticancer effects, especially against breast cancer. Vitamin E not only improves insulin action, it also exerts a number of beneficial effects when taken at dosages ranging from 400 to 800 IU, which may aid in preventing the long-term complications of diabetes. Activate Your Body's Natural Ability to Burn Fat and Lose Weight Fast by Mark Hyman --

Summary, Review and Analysis HarperCollins

Please note: This is a companion version & not the original book. Sample Book Insights: #1 America is a fat nation, and we are failing to solve our big fat problem. Almost 70 percent of Americans are overweight, and one in two has diabetes, which is the metabolic features of a pre-diabetic obese person. #2 The answer is simple: addiction. We are a nation of food addicts. #3 The science of food addiction is becoming more and more clear,

and a study published in the *American Journal of Clinical Nutrition* proved that higher-sugar, higher-glycemic foods are addictive in the same way as cocaine and heroin. #4 Food addiction is real, and it is the root cause of why so many people are overweight and sick.
