Given the importance that spectators grant to the final moments of a motion picture, it is surprising to find so little written on how films end and how audiences interpret those closing moments. This study investigates endings in film and the lively role they play in how and why viewers make sense of movies. Relying upon contemporary literary criticism and film theory, the author analyses narrative strategies in films ranging from the classical Hollywood motion picture to the more modern European art cinema. To assist readers in understanding the various functions of endings, the films are divided into four critical categories: the "Closed Text" film, typical of classical works; the "Open Story" films; the "Open Discourse" film; and the "Open Text" film which struggles to defy story resolution. Detailed textual analysis of sample films reveal how all of the devices of filmic narration - from "mise-en-scene" to soundtracks - direct a viewer's perception, comprehension and interpretation of closure in films. Among the sample films that are featured as test cases for studying endings are "The Quiet Man" (Ford, 1950), "The 400 Blows" (Truffaut, 1959), "Weekend" (Godard, 1967), "Tout va bien" (Godard, 1972), and "Earth" (Dovzhenko, 1930). To round out his informative study of endings in films, Neupert also examines a host of diverse titles, including "Do the Right Thing" (Lee, 1989), "Open City" (Rossellini, 1945) and "The Graduate" (Nichols, 1967).

"The International Code of Marketing of Breast-milk Substitutes" is the first original legal instrument of its kind adopted by the World Health Organization, in cooperation with UNICEF. The International Code, for the first time at the international plane, deals with a health issue that is of considerable importance to any society, namely, the healthy growth and development of infants. This volume is a thorough analysis of the provisions of the international code, and gives a detailed account of its history. The aim of the International Code and its material scope and definitions and certain known marketing practices to promote the use of breast-milk substitutes are described, as well as its implementation and the question of whether or not Member States of WHO are under a legal obligation to implement it. Modes of implementation are addressed, as is the monitoring of the International Code by States, individually and collectively, as well as self-monitoring by the infant-food industry, and the role of NGOs, institutions and individuals in the process. An appendix, containing the text of the International Code, and the relevant resolutions of the World Health Assembly and the Executive Board of WHO, a bibliography and a detailed index conclude the volume.

M. Robert There appears to be much needed a work on parliamentary law, based, in its general principles, upon the rules and practice of Congress, and adapted, in its details, to the use of ordinary societies. Such a work should give, not only the methods of organizing and conducting the meetings, the duties of the officers and the names of the ordinary motions, but in addition, should state in a systematic manner, in reference to each motion, its object and effect; whether it can be amended or debated; if debatable, the extent to which it opens the main question to debate; the circumstances under which it can be made, and what other motions can be made while it is pending. This Manual has been prepared with a view to supplying the above information in a condensed and systematic manner, each rule being either complete in itself, or giving references to every section that in any way qualifies it, so that a stranger to the work can refer to any special subject with safety.

Controversy over the Iranian nuclear policy has been mounting in both legal and political circles since the early 2000s. Most recently, the IAEA, tasked with verifying compliance of Member States with the NPT, has been expressing concern that Iran's nuclear efforts are directed not solely at peaceful uses but also at military purposes. In response, various States have tried, individually and collectively, to engage Iran in agreed frameworks of action that would include an Iranian self-imposed restraint regarding its nuclear development. This volume documents the Iranian nuclear issue, tracing the evolution of international interest and concern with Iran's nuclear policy since the 1970s, when Iran began earnest efforts to acquire nuclear capabilities. Emphasis is placed on events since 2002-2003, when it was established that Iran had concealed certain aspects of its nuclear activities from IAEA. Alongside reports of the IAEA and Security Council documents, the volume covers diverse sources rather than relying solely on UN organs and agencies, international organisations or dedicated ad hoc bodies.

This book argues that contemporary society in general, and public administration specifically, can benefit from more reflexive learning processes through democracy and public involvement. It identifies the most central social practices, dilemmas, and challenges for public management as well as the mechanisms needed to enact institutional change. Offering a model of reflexivity and learning in the face of public dispute, it explores phenomena such as problem solving, democratization, public learning, and uncertainty to address certain tensions in governance theory and practice. Through a range of well-sourced case studies, this book demonstrates how institutions can manage difficult situations by not only resolving the conflict but addressing the underlying problem. It uses both theoretical and practical approaches to observe the micro foundations of political behavior and its institutional underpinnings, and will be a valuable resource for public administration researchers, practitioners, and graduate students seeking empirical studies of learning processes in the public sphere.

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
