This booklet is intended to provide an introduction for non-specialists or new-comers to the subject of copyright and related rights. It explains in

layman's terms the fundamentals underpinning copyright law and practice. It describes the different types of rights which copyright and related rights law protects, as well as the limitations on those rights. And finally it briefly covers transfer of copyright and provisions for enforcement. Entrepreneurial, Innovative and Sustainable Ecosystems Academic Foundation Start-Up Marketing Strategies in India is a comprehensive book of cases based on real-life marketing challenges faced by Indian start-

ups across a wide range of industries.

Annual Report 2020-21 Springer

This book presents a multidimensional approach by providing a state of the art on EIS ecosystems, as well as structural and changing dynamics and its impact on citizens' quality of life. It provides a set of international benchmarking case studies on good practices and initiatives aimed at creating and fostering EIS ecosystems. It shows how these international benchmarks can be replicated to foster the creation of entrepreneurial and innovative units and promote sustainable practices, under an open innovation paradigm, which conjoins the participation of both public and private stakeholders, using co-creation, transparency and participatory budget practices the jointly improve accountability and public management. This book is a true reference guide for scholars, policy makers and practitioners interested on entrepreneurship, public procurement, innovation and sustainability engaged in building EIS ecosystems, which can enhance citizens' quality of life.

The Interest on Delayed Payment to Small Scale and Ancillary Industrial Undertakings Act, 1993 WIPO

The Postcolonial Age of Migration Taylor & Francis

Business Operations in Singapore Universal Law Publishing

A moral dilemma gripped Professor Gupta when he was invited by the Bangladeshi government to help restructure their agricultural sector in 1985. He noticed how the marginalized farmers were being paid poorly for their otherwise unmatched knowledge. The gross injustice of this constant imbalance led Professor Gupta to found what would turn into a resounding social and ethical movement—the Honey Bee Network—bringing together and elevating thousands of grassroots innovators. For over two decades, Professor Gupta has travelled through rural lands unearthing innovations by the ranks—from the famed Mitti Cool refrigerator to the footbridge of Meghalaya. He insists that to fight the largest and most persistent problems of the world we must eschew expensive research labs and instead, look towards ordinary folk. Innovation—that oft-flung around word—is stripped to its core in this book. Poignant and personal, Grassroots Innovation is an important treatise from a social crusader of our time.

Asia Small and Medium-Sized Enterprise Monitor 2021 Emerald Group Publishing

The BRICS in the New International Legal Order on Investment: Reformers or Disruptors explores

the BRICS approach to modernizing investment treaties. This book, written by BRICS experts, provides unique perspectives on how the BRICS engage in international legal order.

Educational Attainment of Workers BRILL

"TRB's Transportation Research Record:

Journal of the Transportation Research Board, No. 2427 consists of 9 papers that examine ecospeed-controlled vehicles at signalized intersections; the attributes and value of ecologically friendly route choices; network-wide vehicle energy consumption and ecorouting; fuel economy of ecodriving programs in Manila, Philippines, and Tokyo, Japan; and preliminary testing and evaluation of ecolane applications. This issue also explores a model for optimizing ecodriving at signalized intersections; input data for a motor vehicle emissions simulator; incorporation of carbon dioxide emissions and associated fuel consumption in the Texas A & M Transportation Institute Urban Mobility Report; and traffic emissions and air quality near roads in dense urban neighborhoods."--Publisher's description.

Hand Book Of Aromatic & Medicinal Plants And Biodiesel (Jatropha) Springer

This book is a superposition of two distinct narratives: the first is historical, discussing the evolution of astronomical knowledge since the

dawn of civilizations; the second is scientific, conveying mathematical and physical content of each advancement. Great scientists of antiquity, Middle Ages and modern times until the 18th century, are presented along with their discoveries, through short biographies and anecdotes. Special care is taken to explain their achievements using mathematical and physical concepts of their time, with modern perspective added only when ancient methodology is too cumbersome or its language hardly understandable to contemporary readers. The book conveys a lot of astronomical facts and data in a pleasant and accessible manner.

Almost all findings and discoveries made in ancient times are followed by simple mathematical exercises using basic knowledge, so that the reader can check the assertions himself. The book contains a lot of inedited illustrations. Geometrical schemes are given extra attention to make the examples clear and understandable. The language is simple and accessible to the young audience.

Engineers India Research In

This book critically examines the question of migration that appears at the intersection of global neo-liberal transformation, postcolonial politics, and economy. It analyses the specific ways in which colonial relations are produced and reproduced in global migratory flows and their consequences for labour, human rights, and social

justice. The postcolonial age of migration not only indicates a geopolitical and geo-economic division of the globe between countries of the North and those of the South marked by massive and mixed population flows from the latter to the former, but also the production of these relations within and among the countries of the North. The book discusses issues such as transborder flows among countries of the South; migratory movements of the internally displaced; growing statelessness leading to forced migration; border violence; refugees of partitions; customary and local practices of care and protection; population policies and migration management (both emigration and immigration); the protracted nature of displacement; labour flows and immigrant labour; and the relationships between globalisation, nationalism, citizenship, and migration in postcolonial regions. It also traces colonial and postcolonial histories of migration and justice to bear on the present understanding of local experiences of migration as well as global social transformations while highlighting the limits of the fundamental tenets of humanitarianism (protection, assistance, security, responsibility), which impact the political and economic rights of vast sections of moving populations. Topical and an important intervention in contemporary global migration and refugee studies, the book offers new sources, interpretations, and analyses in understanding postcolonial migration. It will be useful to scholars and researchers of migration studies, refugee studies, border studies, political studies, political sociology, international relations, human rights and

law, human geography, international politics, and political economy. It will also interest policymakers, legal practitioners, nongovernmental organisations, and activists.

Entrepreneurship: Creating and Leading an Entrepreneurial Organization Asian Development Bank

This edited volume develops an understanding of the strategies, processes, issues and concerns involved when small and medium-sized enterprises (SMEs) go international with their local products/services and vice versa. It is a compendium of eighteen selected chapters on the subject, supported by an introductory chapter. The contributions are organized in four parts based on the sub-themes they deal with. The first part, containing the introductory chapter, provides different perspectives on transnational entrepreneurship, returnee entrepreneurship and their linkages with the internationalization process. The subsequent parts have chapters dealing with three sub-themes of the subject – the internal factors (individual and firm-level resources), the external factors (entrepreneurial ecosystem), and the

process of organizational transformation and change, respectively, in the context of SME internationalization. Special issues and challenges being faced by SME entrepreneurs in emerging economies have been highlighted in this book, discussing key contemporary issues with regard to internationalization in the three dimensions outlined above. Further, the book explains how an entrepreneur can engineer the transformation of his/her organization into an international SME. This book is a very useful resource for entrepreneurs and policy-makers in general, and for academics and researchers in particular, as it provides an overview of the contemporary research in the critical areas of SME internationalization and transnational entrepreneurship by highlighting the linkages between them with special reference to emerging economies.

Transnational Entrepreneurship Taylor & Francis

Concentrating on the informal sector of the economy—which accounts for an overwhelming proportion of the poor and vulnerable population in India—and their working environments, this analysis is based

on the latest information from the 61st round of the National Sample Survey 2004–2005.

Combining those results with supplemental data, this account proposes two comprehensive bills as well as a number of measures to ensure minimum work conditions and promotions of livelihoods for both the agricultural and nonagricultural laborers. This publication also includes a CD-ROM comprising three other reports from the commission: Social Security for Unorganised Workers, National Policy on Urban Street Vendors, and Comprehensive Legislation for Minimum Conditions of Work. The BRICS in the New International Legal Order on Investment Springer

A new venture or business always stands on the precarious ground of unpredictable challenges wherein it is constantly subjected to pressures from competition and the ever changing dynamics of the market. In this scenario, a venture can only be successful, if it is guided by an entrepreneur who measures situations insightfully and calculates the risks before taking a plunge. Entrepreneurship: Creating and Leading an Entrepreneurial Organization is about creating, managing, and leading an entrepreneurial organization. The contents would help in inculcating an entrepreneurial mindset, developing entrepreneurial skills, and equipping the reader

with the basic knowledge and skills for launching and managing the growth of a venture. The teaching/learning of entrepreneurship require greater focus on experiential learning. Therefore, the book extensively emphasizes on experiential learning and a hands-on approach - 'learning by doing'. Book has cited a number of examples and given cases and exercises from Indian as also global contexts to make entrepreneurship learning an enjoyable experience.

The Oxford Handbook of Industrial Policy
Springer Nature

This book examines policies and practices that relate to the education of female entrepreneurs in China, India, Singapore, Indonesia, and Japan. Through both textual and interview data, the book reveals the importance of initiatives that structure entrepreneurship for women, and informal learning through networks in a variety of settings which promotes their understandings of business. Part I offers an overview of the formal and informal sectors of the economy and the international development plans related to each. Part II proffers national development plans and business policies related to female entrepreneurship in each of the five countries. Part III provides stakeholders' perspectives of entrepreneurial learning in each country. Part IV presents conceptual and theoretical models which offer a visual representation of entrepreneurs' learning process. Finally, Part V grapples with the

inclusion of informal learning and networking experiences for female entrepreneurs.

Masters Speak Bloomsbury Publishing

Industrial policy has long been regarded as a strategy to encourage sector-, industry-, or economy-wide development by the state. It has been central to competitiveness, catching up, and structural change in both advanced and developing countries. It has also been one of the most contested perspectives, reflecting ideologically inflected debates and shifts in prevailing ideas. There has lately been a renewed interest in industrial policy in academic circles and international policy dialogues, prompted by the weak outcomes of policies pursued by many developing countries under the direction of the Washington Consensus (and its descendants), the slow economic recovery of many advanced economies after the 2008 global financial crisis, and mounting anxieties about the national consequences of globalization. The Oxford Handbook of Industrial Policy presents a comprehensive review of and a novel approach to the conceptual and theoretical foundations of industrial policy. The Handbook also presents analytical perspectives on how industrial policy connects to broader issues of development strategy, macro-economic policies, infrastructure development, human capital, and political economy. By combining historical and theoretical perspectives, and integrating conceptual issues with empirical evidence drawn from advanced, emerging, and developing countries, The

Handbook offers valuable lessons and policy insights to policymakers, practitioners and researchers on developing productive transformation, technological capabilities, and international competitiveness. It addresses pressing issues including climate change, the gendered dimensions of industrial policy, global governance, and technical change. Written by leading international thinkers on the subject, the volume pulls together different perspectives and schools of thought from neo-classical to structuralist development economists to discuss and highlight the adaptation of industrial policy in an ever-changing socio-economic and political landscape. *Sustainable Asia* Engineers India Research In

Entrepreneurial ecosystems involve a complex synergy of factors, including social and structural changes that are frequently cumulative within territories, promoting the improvement of citizens' quality of life and higher development levels. Further, dynamic territories are characterized by constant change, activity and progress. Each chapter in this volume examines a specific entrepreneurial ecosystem in an effort to describe why and how certain companies and organizations manage to overcome adversities and achieve strong performance, while others

fail. Unlike the conventional focus, the volume examines microenterprises and Small and Medium Enterprises (SMEs), while also discussing selected experiences and case studies from developed and developing countries alike.

Report on Agriculture World Scientific

"... provides U.S. and other foreign businesses and individuals interested in conducting business operations in Singapore with a general description of the relevant statutes and regulations governing business activities from both the tax and general legal perspectives."--P. iii.
