Who owns the street? Interwar Berliners faced this question with great hope yet devastating consequences. In Germany, the First World War and 1918 Revolution transformed the city streets into the most important media for politics and commerce. There, partisans and entrepreneurs fought for the attention of crowds with posters, illuminated advertisements, parades, traffic jams, and violence. The

Nazi Party relied on how people already experienced the city to stage aggressive political theater, including the April Boycott and Kristallnacht. Observers in Germany and abroad looked to Berlin's streets to predict the future. They saw dazzling window displays that radiated optimism. They also witnessed crime waves, antisemitic rioting, and failed policing that pointed toward societal collapse. Recognizing the power of urban space, officials pursued increasingly radical policies to 'revitalize' the city, culminating in Albert Speer's plan to eradicate the heart of Berlin and build Germania.

Deleuze and Guattari's Anti-Oedipus Kogan Page Publishers The University degree in times past was seen as a sure fire path to success. Today, students are greeted with rising overall cost of attendance and a higher probability of ending up unemployed or underemployed. The book acknowledges that most universities,

their faculty and the courses they offer are not structured or equipped to prepare students to thrive in a highly competitive, value driven capitalist world. It introduces to the reader the concept of "Valuworth" as "...anything you know, anything you have, anything you believe in, anything you can do or create, that is desirable to someone else other than you, for which that someone is willing to exchange something of commensurate value in return"; stressing that thriving in the real world is all about finding and nurturing Valuworth. While

pointing out that most University graduates are yet to establish their Valuworth at the point of graduating, it suggests that in order to bridge the gap between the university and the real world, the student must ensure that the university experience is made a part of their bigger Valuworth plan for life. The book is a must read for every undergraduate, aspiring undergraduate, ambitious graduate and their parents for the following reasons: * It explains what university institutions and their faculty are best motivated to do in

order to help students and their parents better manage their expectations of them.* The book delves into the fundamental differences between "Preparation" and "Education" and why we need to focus more on "Preparation".* The author introduces the concept of "Valuworth" and explains why it is the key to success in the real world.* The reader will be introduced to the FIRST steps to creating and nurturing Valuworth that guarantees a means to always earn a living.* The book explains the 10

notion of "progress" takes on a new meaning and must be distinguished from innovation. The discussion of particular educational approaches, the exploration of digital technologies and the presentation of best practice examples conclude the book.
