Hankin “polygons in contact” —may have been used as templates to generate and then transfer complex two-dimensional star-and-polygon patterns onto flat plaster walls [6]. In 1905 he reported that several interlaced geometric patterns had apparently been drawn with the aid of “triangular and polygonal grids

Good resource. I noticed on the answer sheet for the two star, it says

the first one is a right-angled triangle, but there are 4 points. We

plotted a square. Also the answer of trapezium does not quite match

up with what we have drawn as one short side is smaller (by a point)

than the other side.
