How do you approach a math problem that challenges you? Do you keep trying until you reach a solution? Or are you like Amy, who gets frustrated easily and gives up? Amy is usually a happy and enthusiastic student in grade five who loves to dance, but she is struggling with a tough math assignment. She doesn’t think she is good at math because her classmates always get the answers faster than she does and sometimes she uses her fingers to help her count. Even though her mom tries to help her, Amy is convinced she just cannot do math. She decides not to do the assignment at all since she thinks she wouldn’t do well anyway. As Amy goes about her day, her experiences at ballet class, the playground, and gym class have her thinking back to how she gave up on her math assignment. She starts to notice that hard-work, practice, and dedication lead to success, thanks to her friends and teachers. She soon comes to understand that learning math is no different than learning any other skill in life. With some extra encouragement from her math teacher, a little help from her mom, and a new attitude, Amy realizes that she can do math!

This book has been developed to make designing mandalas and circular patterns as simple as possible. No more marking out and measuring - and discovering too late that one or more of your measurements were wrong. With this book you will be ready to draw and doodle designs straight away for a truly relaxing drawing experience. Each page contains a radial grid template with 64 "spokes" and concentric circles to use as guidelines while drawing. All lines are an unobtrusive grey - visible enough to aid your drawing but not so much that they are obvious on your final piece. Design your own colouring book and colour your designs when completed. Or doodle mandala ideas and trace over with ink. Mandalas are well known for their meditative inducing abilities in the colouring world. Drawing them induces the same relaxing state focussing your attention on the design process and calming your mind. Great for beginner doodlers or those wanting to get back into drawing. The symmetrical nature of these radial designs helps to develop your "artists eye", your drawing & recording ability - looking and seeing to repeat the design around the circle. Makes a perfect gift for doodlers or colouring enthusiasts.
