Step 1. Sphere. The first step in drawing the head using the Loomis Method (which is the one that is most widely used because of its effectiveness) is drawing a sphere. Learning to draw spheres is an important step in learning to draw in dimension because it is one of the main forms used to simplify any complex object.

The muzzle becomes easier to draw in all sorts of tilted positions. The slant of the cheeks and the rounded rectangle of the forehead fall into place within the three divisions of the face. By thus representing the head in block form, we determine the angles throughout the head. This is our first step toward the perspective of the head. PLATE 11.
