and language, providing
detailed descriptions and
exercises for creating the
sounds of the language.

They take a uniquely
systematic approach, fusing
together best practices from
international music
conservatories for diction
study, with those for Chinese
language learning. Part two
outlines the historical context
of Chinese vocal literature,
chronicling the development
of the language and its

Blending fact and fiction, this darkly comic fable “ may be the purest distillation yet of Mr. Ma ’ s talent for probing the country ’ s darkest corners and exposing what he regards as the Communist Party ’ s moral failings ” (Mike Ives, The New York Times). Called “ Red Guards meet Kurt Vonnegut . . . powerful!” by Margaret Atwood on Twitter, China Dream is an unflinching satire of totalitarianism. Ma Daode, a corrupt and lecherous party official, is feeling pleased with himself. He has an impressive office, three properties, and multiple mistresses who text him day and night. After decades of loyal service, he has been appointed director of the China Dream Bureau, charged with replacing people's private dreams with President Xi Jinping's great China Dream of national

rejuvenation. But just as he is about to present his plan for a mass golden wedding anniversary celebration, his sanity begins to unravel. Suddenly plagued by flashbacks of the Cultural Revolution, Ma Daode's nightmare visions from the past threaten to destroy his dream of a glorious future. Exposing the damage inflicted on a nation's soul when authoritarian regimes, driven by an insatiable hunger for power, seek to erase memory, rewrite history, and falsify the truth, China Dream is a dystopian vision of repression, violence, and state – imposed amnesia that is set not in the future, but in China today.

Learning Chinese can be frustrating and difficult, partly because it's very different from European languages. Following a teacher, textbook or language course is not enough. They show you the

characters, words and grammar you need to become proficient in Chinese, but they don't teach you how to learn them! Regardless of what program you're in (if any), you need to take responsibility for your own learning. If you don't, you will miss many important things that aren't included in the course you're taking. If you study on your own, you need to be even more aware of what you need to do, what you're doing at the moment and the difference between them. Here are some of the questions I have asked and have since been asked many times by students: How do I learn characters efficiently? How do I

get the most out of my course or teacher? Which are the best learning tools and resources? How can I become fluent in Mandarin? How can I improve my pronunciation? How do I learn successfully on my own? How can I motivate myself to study more? How can I fit learning Chinese into a busy schedule? The answers I've found to these questions and many others form the core of this book. It took eight years of learning, researching, teaching and writing to figure these things out. Not everybody has the time to do that! I can't go back in time and help myself learn in a better way, but I can

help you! This book is meant for normal students and independent language learners alike. While it covers all major areas of learning, you won't learn Chinese just by reading this book. It's like when someone on TV teaches you how to cook: you won't get to eat the delicious dish just by watching the program; you have to do the cooking yourself. That's true for this book as well. When you apply what you learn, it will boost your learning, making every hour you spend count for more, but you still have to do the learning yourself. This is what a few readers have said about the book: "The book had

me nodding at a heap of things I'd learnt the hard way, wishing I knew them when I started, as well as highlighting areas that I'm currently missing in my study." - Geoff van der Meer, VP engineering "This publication is like a bible for anyone serious about Chinese proficiency. It's easy for anyone to read and written with scientific precision." - Zachary Danz, foreign teacher, children's theatre artist About me I started learning Chinese when I was 23 (that's more than eight years ago now) and have since studied in many different situations, including serious immersion programs

abroad, high-intensity programs in Sweden, online courses, as well as on the side while working or studying other things. I have also successfully used my Chinese in a graduate program for teaching Chinese as a second language, taught entirely in Chinese mostly for native speakers (the Graduate Institute for Teaching Chinese as a Second Language at National Taiwan Normal University). All these parts have contributed to my website, Hacking Chinese, where I write regularly about how to learn Mandarin.

• The basis for the HBO documentary now streaming on HBO Max For five years, James and Deborah Fallows have travelled across America in a single-engine prop airplane. Visiting dozens of towns, the America they saw is acutely conscious of its problems—from economic dislocation to the opioid scourge—but it is also crafting solutions, with a practical-minded determination at dramatic odds with

the bitter paralysis of national politics. At times of dysfunction on a national level, reform possibilities have often arisen from the local level. The Fallows describe America in the middle of one of these creative waves. Their view of the country is as complex and contradictory as America itself, but it also reflects the energy, the generosity and compassion, the dreams, and the determination of many who are in the midst of making things better.  OVERVIEW OF WORDS Mandarin which

enables you to quickly learn the next level of the language—following the first book in the series, Elementary Mandarin Chinese Textbook. The 24 lessons in this book are meant to be used in 3 hours per week of class instruction over one academic year. Students will need another 2–3 hours of outside practice and review for every hour of class time using the materials in the Continuing Mandarin Chinese Workbook that accompanies this textbook. These books can also be used by self-study learners due to the extensive explanations and free supplementary materials available including online audio and video recordings and flash cards. The entire course can be completed in 25 to 35 weeks and teaches you the basic skills of listening, speaking, reading and writing Mandarin Chinese at a conversational level. Each lesson starts with a dialogue and includes a list of new and supplementary vocabulary along with questions and grammar notes about the dialogue, a reading section and extensive exercises (that are in the Workbook). Continuing Mandarin Chinese Textbook offers the following significant advantages over other similar textbooks: Everyday Chinese

dialogues are used for listening and practice – complete with vocabulary lists and questions and storylines based on actual everyday experiences in China. Chinese grammar is explained in simple, non-technical terms with useful notes and tips given. Reading exercises are provided for all new words and phrases in each lesson. Free online audio recordings by native speakers from various parts of China help you not only acquire the correct pronunciation but also to understand Chinese speakers who have different accents. Illustrations and supplementary video clips add authenticity to the dialogues in the book. A Chinese-English dictionary is provided at the back for easy reference. Chinese characters and Pinyin Romanized forms are used throughout the book except for the reading exercises—so this book is usable by learners who wish to focus on learning the spoken language and do not necessarily want to learn to read and write Chinese. This textbook should be used with the accompanying Continuing Mandarin Chinese Workbook and with the accompanying audio files, which can be downloaded free directly from the Tuttle website.

Suntific, Books by the Intellectual Engagé for Intellectuals Our computers and mobile devices do wonderful things for us. But they also impose a burden, making it harder for us to focus, do our best work, build strong relationships, and find the depth and fulfillment we crave. How to solve this problem? Hamlet's BlackBerry argues that we just need a new way of thinking, an everyday philosophy for life with screens. William Powers sets out to

solve what he calls the conundrum of connectedness. Reaching into the past—using his own life as laboratory and object lesson—he draws on some of history's most brilliant thinkers, from Plato to Shakespeare to Thoreau, to demonstrate that digital connectedness serves us best when it's balanced by its opposite, disconnectedness. Lively, original, and entertaining, Hamlet's BlackBerry will challenge you to rethink your digital life. (HSK Levels 1 -3) A

For anyone who wants to learn a foreign language, this is the method that will

stick. "A brilliant and thoroughly modern guide to learning new languages."—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Guitar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn't learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he's discovered. Starting with pronunciation, you'll learn how to rewire your ears and turn foreign sounds into familiar sounds. You'll retrain your tongue to produce

those sounds accurately, using tricks from opera singers and actors. Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.
