Learn to Drive Smart How the radical disruption of the auto industry affects you—and how you can prepare for the soon-to-be “new normal” The combined effect of autonomous driving, electric vehicles, and the sharing economy is on the verge of changing the auto industry—all within the next decade. And this tech/economics revolution will touch virtually every industry. What exactly will change? Jobs: Demand for

commercial vehicle drivers, car dealers, mechanics, doctors, and many other professions will shrink. Laws: Manually driving cars will be forbidden—and car ownership will be almost nonexistent. Housing: Prices will drop and cities and towns will be planned differently. Healthcare: Infrastructure will shrink as traffic accidents dramatically decline. Global trade: China will become the world's biggest automotive exporter. The Last Driver License Holder Has Already Been Born provides the information and insight you need to position your company for these groundbreaking changes. It reveals the disruptive technologies now taking shape and provides a timeline of when they will take hold. It examines the impact on the industry itself, as well as adjacent sectors, including jobs and professions, city and street design, hospitals, insurances, politics, security, hospitality industry, the oil industry, real estate, and society at large. And it provides the knowledge and insight you need to keep yourself and your organization ahead of the curve—and in front of the competition.

Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that

state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to

transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.

Two neurolearning experts reveal the hidden benefits of having a dyslexic brain. In this paradigm-shifting book, neurolearning experts Drs. Brock and Fernette Eide describe an exciting new brain science that reveals that dyslexic people have unique brain structure and organization. While the differences are responsible for certain challenges with literacy and reading, the dyslexic brain also gives a predisposition to important skills, and special talents. While dyslexics

typically struggle to decode the written word, they often also excel in such areas of reasoning as mechanical (required for architects and surgeons), interconnected (artists and inventors); narrative (novelists and lawyers), and dynamic (scientists and business pioneers). The Dyslexic Advantage provides the first complete portrait of dyslexia.
