[Electronic Alarm Circuits Manual](#) Createspace Independent Publishing Platform

Indeed, this work will forever be an unfinished edition due to its intrinsic nature. for instance, chapters six and ten ought to be written by each reader who is interactively embracing this work. Furthermore, the penultimate chapter - Penny for the Children: the Penny Scholarship Fund, can only be conclusively written by the last recipient of "The Penny Scholarship Fund." the aforementioned is not an afterthought but rather an integral part of this work like a diamond in the rough. Therefore, it ought not to be a surprise that the "content" does list the "addendum."

*Wireless Cofferdam Alarm System Operation Manual*

The wireless cofferdam alarm system was developed to allow Maintenance Activities to monitor cofferdam blanking patch differential pressure seals on patches intended to be in service for extended periods (greater then seven days). The most typical application is for monitoring cofferdam seals for blanking patches use on extended Planned Incremental Availabilities (PIA) on Aircraft Carriers. The remainder of this manual will describe application of the system on this most typical application. Other system applications shall be planned in advance through consultation with NAVSEA 00C5.
