For the first time ever, world-famous photographer and fashion lighting instructor Frank Doorhof takes you behind the scenes to reveal every step of his model-photography workflow—the same workflow that has made him a hero to photographers around the world thanks to his practical, budget-conscious, no-nonsense approach. In this groundbreaking book, Frank starts right at the beginning with how to find models, find great locations, work with backgrounds (you'll be amazed at his tricks for creating stunning backgrounds for just a few bucks), and work by yourself or with a team (stylist, hair stylist, and makeup artist) to create an image that will get your photography noticed. Then, it's on to an in-depth look at the lighting setups and looks that made Frank famous (complete with diagrams and detailed explanations). You'll see how Frank lights his images (you'll be shocked at how simple most of his lighting setups are and you'll be able to create these same setups yourself), plus he covers the critical little stuff nobody else is talking about, including: how to calibrate your monitor (and why it's so important); how to use a color target to nail your color every single time; and why (and how) to use a light meter to get consistent, reproducible lighting each and every shoot. Frank also shares his own retouching techniques through step-by-step tutorials, and he takes you from start to finish through a number of different looks so you can see exactly how it's done, and recreate these same looks yourself. If you've ever wished there was one book that covers it all, the whole process of photographing models from start to finish, not leaving anything

out, then this is the book for you.

Creating DSLR Video CRC Press

Videojournalism is a new field that has grown out of traditional print photojournalism, slideshows that combine sound and pictures, public radio, documentary filmmaking and the best of television news features. This amalgam of traditions has emerged to serve the Internet's voracious appetite for video stories. Videojournalism is written for the new generation of "backpack" journalists. The solo videojournalist must find a riveting story; gain access to charismatic characters who can tell their own tales; shoot candid clips; expertly interview the players; record clear, clean sound; write a script with pizzazz; and, finally, edit the material into a

piece worthy of five minutes of a viewer's attention. Videojournalism addresses all of these challenges, and more - never losing sight of the main point: telling a great story. This book, based on extensive interviews with professionals in the field, is for anyone learning how to master the art and craft of telling real short-form stories with words, sound and pictures for the Web or television. The opening chapters cover the foundations of multimedia storytelling, and the book progresses to the techniques required to shoot professional video, and record high quality sound and market the resulting product.
