As a beginner or professional photographer or filmmaker, you don't need to struggle to figure out how to use the Canon EOS Rebel T8i/850D if you can take the step to purchase this book.Early February in 2020, Canon, arguably the best camera producer in the globe today and a giant creator of digital solutions, revealed the aesthetic Canon EOS Rebel T8i/850D, a beauty that speaks more pleasantly than its tag - Rebel. The camera was unveiled as a high-performing device and brandished with high-quality features. The picturing device is easily Canon's most populous Digital Single-Lens Reflex (DSLR) camera line manufactured in the last few years. Likewise, the most intriguing aspect of it is that it gives a soft landing to those who are previously most exposed to Smartphones and other picturing devices. This leverage means that neophytes do not have to bother themselves with getting abreast with the technicalities of the camera. Canon, with this design, has provided an incredible performance level, which gives users control over the device. It has also been given an affordable and supportive setup for beginners and more experienced users.Embodied in the Canon EOS Rebel T8i/850D is a 24.1-megapixel Advanced Photo System type-C (APS-C) size sensor which is similar to the kind of sensor found in one of Canon's top designs, the T7i camera. Although, the image quality between both cameras is nearly identical, with the T8i given a little nudge. However, as an advantage, Canon placed in the T8i a DIGIC eight image processor which allows for the filming of Ultra High Definition (UHD) 4k video at 24 frames per second.A preview of what you will get if you purchase this book include; Unleashing the Canon EOS Rebel T8i/850D Exploring and Mounting Lenses Tour of the Canon EOS Rebel T8i/850d External Features/Buttons Shooting Features and Menu Basics Exposure Modes and Creative Control Playback Features and Functions Playback Mode and Settings Multi-image Display Jumping Images Rotating an Image Shooting Review Time Histogram Information Display Protecting Images Resizing and Cropping Images The Red-Eye Effect Processing a Raw Image Computer Processing Camera Processing Sending Pictures to Computers Importing Pictures via Cables or Card Readers Importing Pictures via Wi-Fi Useful Camera Tips Time-Lapse Recording Trim the Beginning and End of a Movie Mirror Lock-Up (MLU) Slide Shows Create Video Snapshots Change the Video System for a Television (TV) Mirror Images from the Camera to a TV Display RAW images in HDR TVs And Lots More Scroll up and click the BUY Button to get this book in your Library

Getting Started With DSLR Photography John Wiley & Sons

A lot has changed since I wrote and published this first volume of what became this guide series. One thing hasn't. I still have the same enthusiasm and joy in photography I had way back at the beginning of the series. I have a lot more knowledge and experience now and, occasionally even get close to taking good photographs. That's the thing, see. I didn't know a lot when I originally wrote this guide. I had been working in photography since 1982 professionally. Everything I knew, pretty much, was self-taught. In general, that's still true. There's no need for you to do it all by yourself, too, though. This book and this series are meant to help you get going with the basics fast. Yes, OK, I tend to relate my own experiences, but that, too, is meant to help you avoid some basic mistakes I made. And, perhaps, I write in a tad too friendly manner, but think of it as sitting down with me to have a friendly talk about a passion we share: Photography!

Videojournalism is a new field that has grown out of traditional print photojournalism, slideshows that combine sound and pictures, public radio, documentary filmmaking and the best of television news features. This amalgam of traditions has emerged to serve the Internet's voracious appetite for video stories. Videojournalism is written for the new generation of "backpack" journalists. The solo videojournalist must find a riveting story; gain access to charismatic characters who can tell their own tales; shoot candid clips; expertly interview the players; record clear, clean sound; write a script with pizzazz; and, finally, edit the material into a piece worthy of five minutes of a viewer's attention. Videojournalism addresses all of these challenges, and more - never losing sight of the main point: telling a great story. This book, based on extensive interviews with professionals in the field, is for anyone learning how to master the art and craft of telling real short-form stories with words, sound and pictures for the Web or television. The opening chapters cover the foundations of multimedia storytelling, and the book progresses to the techniques required to shoot professional video, and record high quality sound and market the resulting product. Videojournalism also has its own website - go to just one URL and find all the stories mentioned in the book. You also will find various "how-to" videos on the site. To keep up with the latest changes in the field such as new cameras, new books, new stories or editing software, check the site regularly and "like" www.facebook.com/KobreGuide.
