**International DT466E (Electronic) Engine Data Sheet**  
The DT466 generates torque at a favorably low 1,300 rpm and the latest model has a governed speed of 2,400 rpm. Modern versions of the engine prove that the HEUI injection system is sophisticated enough to cope with strict emissions control requirements in the United States, although the consensus is that this mode of injection is seemingly outdated since widespread adoption of high pressure common rail technology.
