Marshaling evidence from a wide array of international sources, including the black presses of the time, Penny M. Von Eschen offers a vivid portrayal of the African diaspora in its international heyday, from the 1945 Manchester Pan-African Congress to early cooperation with the United Nations. Tracing the relationship between transformations in anti-colonial politics and the history of the United States during its emergence as the dominant world power, she challenges bipolar Cold War paradigms. She documents the efforts of African-American political leaders, intellectuals, and journalists who forcefully promoted anti-colonial politics and critiqued

U.S. foreign policy. The eclipse of anti-colonial politics—which Von Eschen traces through African-American responses to the early Cold War, U.S. government prosecution of black American anti-colonial activists, and State Department initiatives in Africa—marked a change in the very meaning of race and racism in America from historical and international issues to psychological and domestic ones. She concludes that the collision of anti-colonialism with Cold War liberalism illuminates conflicts central to the reshaping of America; the definition of political, economic, and civil rights; and the question of who, in America and across the globe, is to have access to these rights.

Handbook of Internal Migration in India is an inter-disciplinary, multi-faceted and thought-provoking book on internal migrants and their dynamics among the states in India. The first of its kind, this handbook provides novel information on processes, trends, determinants, differentials and dynamics of internal migration and its inter-linkages with individuals, families, economy and society. Most of the chapters have been written by scholars of repute who have spent their lifetime working on migration and the factors associated with it. This handbook is an attempt to address the lacunae in internal migration studies using both big data, such as Indian censuses, National Sample Surveys, India Human Development Surveys and Kerala Migration Surveys, and micro-level data collected by

enthusiastic researchers in most parts of India to explore the unknown facets of internal migration. This book employs interdisciplinary and mixed methods to examine issues such as climate change, gender, urbanization, caste/tribe, religion, politics and emergence of migration policies. It addresses the crucial question as to why temporary and short-term migration continues to be an important livelihood strategy for millions of migrants thereby having an everlasting impact on the sociopolitical and economic structure of the country.

The topic of the 43rd Congress of the International Institute of Public Finance was "Public Finance and the Performance of Enterprises." The title reflected profound changes in the thinking and approaches of economists traced back to economic developments such as the worldwide slowing down of economic growth, dwindling of productivity increases, growing unemployment, and rampant increase in public debt experienced during the 1970s and 80s. The Congress was not primarily concerned therefore with the economic efficiency of particular enterprises, but with the interface of Public Finance and the behavior of enterprises. The intent was to detect how fiscal policy decisions effect the behavior of enterprises and how this in turn influences the overall performance of an economy--to seek microeconomic foundations for macroeconomic relationships. This volume presents the proceedings of

the 43rd Congress with papers from numerous international contributors.

The Joint Committee on Human Rights examined the implementation of the UN International Covenant on Economic, Social and Cultural

Rights in the UK. Domestic legislation protects many of the economic, social and cultural rights, with the Covenant itself having little impact in UK domestic law. The Committee believes that there is scope for incorporating further protection of rights in the UK, by enshrining some of the guarantees contained in the Covenant. Further, that for the Covenant rights to be effective, they should be part of a framework for government policy development, and that Government along with the Commission for Equality and Human Rights should develop ways of measuring the progress of these rights. The Committee also recommends, that explanatory notes to Bills, should include discussion of the Bills compatibility with Covenant rights, which is a way of enhancing the scrutiny of proposed Government legislation. Furthermore, the Committee recommends the introduction of an Equality Bill, to address the concerns of discrimination faced by ethnic minorities and persons with disabilities in employment, housing and education.

This paper reviews the accuracy of the OECD Economic Outlook projections -- both "current year" and "year ahead"--For output growth, inflation and current account balances (as a percentage of GDP) for the major seven countries, as well as projections for world trade growth. The sample period differs somewhat between the variables, depending on data availability, but it runs until 1998 in all cases. Several evaluation criteria were used to assess the accuracy of the OECD Economic Outlook projections. These include an inspection of projection error summary statistics; comparisons with "naive" alternative forecasts; statistical tests for unbiasedness and efficiency; and testing for directional accuracy. In addition, the paper provides an examination of the performance of OECD Economic Outlook projections over different time periods. The findings suggest that, on the basis of
