The light will turn off automatically after a set amount of time. The ON-TIME control should be set

Heath Zenith Motion Light Features - Dualbrite(r) Intelligent Lighting Control Settings

It's dualbrite lighting system provides both security and energy savings by using two levels of light. The low level light begins at dusk and runs through the night unless motion is detected. Then the high level lighting activates upon being triggered by motion.

DualBrite Motion Sensor Light Control Light comes on half bright for selected time after dusk (Off, 3 hr., 6 sensor head must be rotatedhr., until dawn). Selecting OFF disables this feature. The motion sensing features will continue to work as described in electrical shock.this manual. If motion is sensed, the light turns on full bright
