How do you replace a legend? For Ducati, the Italian motorcycle manufacturer worshiped by racers and riders all over the world, the answer was to start from scratch. When the company decided to produce a successor to its immensely popular 916/996/998 series, it allowed designer Pierre Terblanche to create a completely new bike built from the inside out. This approach resulted in a radically styled motorcycle whose improved ergonomics offer greater comfort and control, with more agile handling at all speeds. Ducati also broke with tradition by allowing two of the world's top motorcycling writers, Alan Cathcart and Marc Cook, to document the birth of the 999-from the earliest design ideas through final production. In an industry where product plans and manufacturing techniques are usually guarded like state secrets, Cathcart and Cook were given complete access to the designers, engineers, and technicians who worked to make the 999 a superbike sensation.

For fifty years, the name McLaren has been synonymous with winning. Founded by driver Bruce McLaren, the team scored its first Grand Prix win in 1968 and dominated the Can-Am sports-car series from 1967 to 1971. In the 1970s McLaren captured two Formula One titles and two victories at the Indianapolis 500. Even greater success followed in the ensuing decades as McLaren International. Today McLaren is one of the defining teams in Formula One, with a record of victories and championships rivaled only by Ferrari. Tyler Alexander was there from the very beginning. He was a founding member of Bruce McLaren Motor Racing Ltd. in 1964, and was eventually named chief engineer and a team director. While Tyler played a critical role in creating its earliest cars, he was also recording the team's progress through hundreds of vivid photographs taken during spare moments at the track and behind the scenes in the McLaren factory. McLaren From the Inside collects the best of Alexander's behind-the-scenes photographs from two very different eras. Part I covers the team's formative years in the 1960s, through black-and-white shots of Bruce McLaren and company building, testing, and racing cars in England and around the world. Friends and competitors are also included, among them such great drivers as Jim Clark, Dan Gurney, and Jackie Stewart, as well as team leaders John Cooper, Carroll Shelby, and Colin Chapman. In Part II Alexander captures the high-tech, hypercompetitive atmosphere of today's Formula One scene, with images taken during the first decade of the

21st century of a new generation of driving talent, including Fernando Alonso, Jenson Button, Lewis Hamilton, Kimi Räikkönen, and others. Alexander's images also show the designers, engineers, and mechanics who have made McLaren such a successful motor racing team for so many years.--Publisher's description.

The Ducati Story is brought right up to date in this new edition of Ian Falloon's authoritative book, covering the complete history of the marque. Initially under government control, Ducati went through several decades of ups and downs, characterized by dubious managerial decisions. Held together by the great engineer Fabio Taglioni, the father of desmodromic valve gear, Ducati produced some of the finest motorcycles of the 1950s, 1960s and 1970s: the Marianna, desmo 125 single, Mach 1, 750 and Pantah. Taglioni also instigated Ducati's return to racing, and victory in the 1972 Imola 200 was the turning point. Mike Hailwood rode the 900 Ducati to victory in the 1978 Isle of Man Formula One race and Tony Rutter took four World TT2 Championships. Cagiva purchased Ducati in 1985, bringing a new engineer, Massimo Bordi, and new designs - most famously the Desmoquattro. In various guises, this model dominated the World Superbike Championship during the 1990s, particularly in the hands of Carl Fogarty. Landmark models included the 916 and Monster, and, with the sale of Ducati to the Texas Pacific Group in 1996, the company continued to grow. The racing program expanded to MotoGP and new model families were introduced. With control taken by the Italian company InvestIndustrial in 2006, Ducati embarked on the next era of development: Casey Stoner winning the MotoGP World Championship in 2007. Now under the Audi umbrella Ducati continues to thrive. This new edition includes a brand new chapter featuring all the models from 2012 up to 2018.
