“ To appoint yourself project leader on your own bike is exciting, ” says Cycle World columnist and performance guru Kevin Cameron, “ but then you need a plan that you can actually carry through. ” For a decade, Cameron ’ s bestselling Sportbike Performance Handbook has been helping readers and riders make those plans and put them into motion--building better, faster, more powerful bikes. This new edition does everything the first did, and more, bringing bikers up

to date on the dramatic changes that have swept sportbike technology in the past ten years. Cameron goes deep inside the world of performance, offering usable insights into how systems work as well as how modifications and aftermarket trickery translate into more power and better handling on the street or at the track. Component by component, he describes the secrets of speed in minute detail, all with added color photographs and new diagrams. This edition covers changes to fuel management, suspension, tire technology, brake systems and more. It is the essential tool for anyone looking to coax maximum performance from a sportbike.

In twenty-five years, Greeves produced around 25,000-30,000 machines - a number considered relatively modest when compared with some of their contemporaries, such as Triumph. However, Greeves was not small in ambition, or indeed achievement, which is resoundingly illustrated in this new book. From a tentative start in the early 1950s, Greeves expanded through the 1960s, producing scrambler, trials, road racing and road bikes. Founders Bert Greeves and Derry Preston Cobb produced machines from their factory at Thundersley in Essex, establishing a world-wide reputation in motorcycle sport,

particularly off-road competition.

Greeves - The Complete Story gives a detailed history from the early 1950s to the 1970s. With production histories and specification details for all the main models, and hundreds of photographs throughout, it is the ideal resource for anyone with an interest in these classic sporting motorcycles. The book covers: Bert Greeves, Derry Preston Cobb and the formative years - from invalid carriages to motorcycle production in 1953; model-by-model specification guides for the main roadsters, scramblers, trials bikes and road racing bikes; world-wide motorcycle sport success, including European Championship wins for Greeves scramblers in 1960 and 1961; the final years - 1972-1979; and advice on owning and restoring a Greeves model today. Superbly illustrated with 299 colour and black & white photographs.

Finally! The world's most incredible motorcycles are given the artful representation they deserve. The motorcycle should have disappeared with the advent of the inexpensive automobile, since Henry Ford's Model T usurped the motorcycle's position as a primary form of utilitarian transportation, but a funny thing happened on the way to extinction - the motorcycle not only survived but thrived.

Enough people were enamored of the thrill and beauty of the two-wheeled mechanical beast to ensure it would continue to exist indefinitely. And exist they have!

Many of the motorcycles manufactured over the past century truly fit the description of "classic," and many consider these machines works of art. Written by noted motorcycle author Patrick Hahn, *Classic Motorcycles* presents the history of motorcycling as told through the most significant, iconic, classic motorcycles of all time, with both period photography

and modern portrait photography. together with the particulars of All the best domestic and international makes are represented here, from BMWs, Indians, and Triumphs to Vincents, Ducatis, and Harley-Davidsons - the most classic models. You'll drool over the 1933 Matchless Silver Hawk. Each motorcycle was shot in a studio setting using photographer Tom Loeser's light-painting technique. Period ads and relevant historic photos and documents are spread throughout the book to supplement the portraits of the bikes, really evoking a sense of time and place. Prepare to be in awe of the undeniably classic motorcycles in this collection. It's the only motorcycle history you'll need. DIVA photographic chronology of some of the fastest, most stylish, and most individualized bikes in motorcycling history. /divDIV Originally used as a slur against riders who used hopped-up motorcycles to travel from one transport caf Æ © to another, â € œcaf Æ © racer â € ? describes a bike genre that first became popular in

1960s British rocker subculture although the motorcycles were also common in Italy, France, and other European countries. The rebellious rock-and-roll counterculture is what first inspired these fast, personalized, and distinctive bikes, with their owners often racing down public roads in excess of 100 miles per hour (up, in British slang), leading to their public branding as ton-up boys. Cafe Racers traces cafe racer motorcycles from their origins in the mid-twentieth century all the way into modern times, where the style has made a recent comeback in North America and Europe alike, through the museum-quality portraiture of top motorcycle photographer Michael

Lichter and the text of motorcycle culture expert Paul Orland. Chronologically illustrated with fascinating historical photography, the book travels through the numerous ever-morphing and unique eras of these nimble, lean, light, and head-turning machines. Cafe Racers visually celebrates a motorcycle riding culture as complex as the vast array of bikes within it. /div

Cafe Racers

Now in my eighties, I met scores of famous people within the motorcycle and car racing world and became lifelong friends with many of them. I'd work and professionally road race for the Honda, Yamaha, and Bridgestone factory teams, win national championships for two of them, and be associated with Bombardier, maker of Ski-Doo snowmobiles and Sea-Doo watercraft when they undertook the development and

manufacture of the Can-Am, a North American off-road motorcycle to challenge the Japanese. I'd also spend forty-years importing Bombardier-Rotax racing engines from Austria. I'd do motorcycle development projects for several other manufacturers and even a motorcycle project for General Motors, then the largest corporation the world had ever known. I'd win the Baja 500 off-road car race for another automobile manufacturer, American Motors, on a team sponsored by film star James Garner, with teammate Bob Bondurant, a former Formula 1 race car driver. But all that was yet to come and in no way could I have portended what excitement, success, and personal notoriety lay ahead in my then-young life. I'd become living proof that the United States was truly the land of opportunity. If one was prepared to be dedicated and work hard, almost any dream could come true.
