Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

Read Matthew Biberman's posts on the Penguin Blog. "If you believe it is possible to fall in love with a motorcycle, you will love this book." -Jay Leno When Big Sid had a heart attack and gave up the will to live, his son Matthew Biberman panicked. Impulsively, Matthew promised his father that they would build a Vincati together. This fusion of two legendary motorcycles, the Vincent Black Shadow and the Ducati GT, a Vincati was considered near-impossible to build. But if anyone could do it, Matthew knew his father could. Big Sid was the mechanic to see about repairing Vincents for nearly sixty years. But now, Sid was old, busted up and broke. Matthew, despite sharing his dad's passion, had become a Shakespearean scholar. The two men hadn't spoken in years-but called a truce to attempt a shared dream. Zen and the Art of Motorcycle Maintenance meets Shop Class as Soulcraft, in this heartfelt memoir that shows how two very different men built a legendary motorcycle, and along the way, discovered what it means to be father and son.

The 916 spearheaded the Ducati revival of the 1990s. Introduced at the end of 1993, this product of Massimo Tamburini and the Cagiva Research Centre took the water-cooled four-valve engine of the 851, placing it in an evolutionary chassis with revolutionary styling. The 916 immediately set new standards of performance for twin-cylinder machines, epitomised by its unequalled success in the World Superbike Championship. This book will trace the conception and development of the four-valve Ducati from its first appearance at the Bol d'Or in 1986. By 1990 Raymond Roche gave Ducati their first World Superbike Championship, this being followed by Texan Doug Polen. Star British rider Carl Fogarty then took over the reins, and along with Troy Corser and Troy Bayliss dominated the World Superbike Championship from 1994 until 2001. Along with the factory racers, all the related four-valve models will be covered in depth, from the initial 851 and 888, to the 748, ST4 and 996. All the variants, including the Sport Production series, will be detailed, along with the rare and beautiful Supermono. This book is the definitive guide to these legendary Ducati models. Ian Falloon is one of the world's leading motorcycle historians. He has more than 40 years experience with motorcycles, spent 25 years writing for magazines around the world, and has written numerous books about motorcycles. He specialises in Italian marques such as Moto Guzzi, Laverda, MV Agusta, and of course, Ducati.

This book is an account of the companies and individuals, who have played a major part in the design and advancement of motorcycle frame (chassis) performance. These independent companies began to spring up in the early postwar years, when motorcycle racing began to take place again. Due to the lack of available factory machines and the urge to improve performance of the now aged equipment, riders began to build their own frames around whatever engines were available. Success brought recognition, and people were soon wanting to buy winning machines, so fledgling companies began to spring up to satisfy the growing demand for custom chassis. Some of these companies soon began to grow, and others appeared in various European countries over the next few years. The state-of-the-art hand built frames were becoming a must for the discerning road bike rider, and so the independent motorcycle frame makers were beginning to put some designs into production, and a thriving business was beginning to emerge. In later years, with such a large choice of factory engines from around the world, the successful independent chassis manufacturers went from strength to strength and some are now producing highly prized road bikes, whilst building one-off machines as required. As the years have passed, one or two of the independent companies have disappeared, but in many cases their machines

have become very collectable classics. The companies still thriving today, as well as producing modern machines with a wide range of engine options, are finding considerable business rebuilding and maintaining machines built in the earlier years. Some of the pioneer builders have become household names to the motorcycle fraternity, and those written about in this book include: Nico Bakker (The Netherlands), Bimota (Italy), Dresda Autos (United Kingdom), Egli (Switzerland), Harris Performance Products (United Kingdom), Hejira racing (United Kingdom), Magni (Italy), Maxton Engineering (United Kingdom), P&M Motorcycles (United Kingdom), Quasar (United Kingdom), Rickman UK (United Kingdom), Colin Seeley Racing (United Kingdom), Segale (Italy) and Spondon Engineering (United Kingdom). This book charts the history of these innovative companies with full specifications for many chassis, and is extensively illustrated throughout. A must for any motorcycle enthusiast, and a valuable reference for the trade.

Finally! The world's most incredible motorcycles are given the artful representation they deserve. The motorcycle should have disappeared with the advent of the inexpensive automobile, since Henry Ford's Model T usurped the motorcycle's position as a primary form of utilitarian transportation, but a funny thing happened on the way to extinction - the motorcycle not only survived but thrived. Enough people were enamored of the thrill and beauty of the two-wheeled mechanical beast to ensure it would continue to exist indefinitely. And exist they have! Many of the motorcycles manufactured over the past century truly fit the description of "classic," and many consider these machines works of art. Written by noted motorcycle author Patrick Hahn, Classic Motorcycles presents the history of motorcycling as told through the most significant, iconic, classic motorcycles of all time, with both period photography and modern portrait photography. All the best domestic and international makes are represented here, from BMWs, Indians, and Triumphs to Vincents, Ducatis, and Harley-Davidsons - the most classic models. You'll drool over the 1933 Matchless Silver Hawk. Each motorcycle was shot in a studio setting using photographer Tom Loeser's light-painting technique. Period ads and relevant historic photos and documents are spread throughout the book to supplement the portraits of the bikes, really evoking a sense of time and place. Prepare to be in awe of the undeniably classic motorcycles in this collection. It's the only motorcycle history you'll need.

Many books have been published about Italian motorcycles, but none has focused exclusively on the Italian motorcycle-based chopper, bobber, trike, and quad custom bike scene - until now. Even though customising is not normally associated with Italian brands, there are some fantastic individually-built Italian custom bikes out there, old and new. In recognition of the trend, Ducati entered into a new market segment when it launched its power cruiser Diavel in November 2010, while Moto Guzzi has its Aquila Nero range ... these and many other custom-style bikes have been well-received in the customs scene. This book looks at some of the fascinating custom projects around the world, accompanied by stunning photography of the finished bikes. A great book for Italian bike fans, and fans of the custom bike scene in general.

DIVA photographic chronology of some of the fastest, most stylish, and most individualized bikes in motorcycling history./divDIV /divDIVOriginally used as a slur against riders who used hopped-up motorcycles to travel from one transport café to another, "café racer" describes a bike genre that first became popular in 1960s British rocker subculture—although the motorcycles were also common in Italy, France, and other European countries. The rebellious rock-and-roll counterculture is what first inspired these fast, personalized, and distinctive bikes, with their owners often racing down public roads in excess of 100 miles per hour ("ton up," in British slang), leading to their public branding as "ton-up boys." Café Racers traces café racer motorcycles from

their origins in the mid-twentieth century all the way into modern times, where the style has made a recent comeback in North America and Europe alike, through the museum-quality portraiture of top motorcycle photographer Michael Lichter and the text of motorcycle culture expert Paul d'Orléans. Chronologically illustrated with fascinating historical photography, the book travels through the numerous ever-morphing and unique eras of these nimble, lean, light, and head-turning machines. Café Racers visually celebrates a motorcycle riding culture as complex as the vast array of bikes within it./div

Although manufactured for only one year, 1974, the Ducati 750 Super Sport was immediately touted as a future classic. It was a pioneer motorcycle – expensive and rare, and produced by Ducati's race department to celebrate victory in the 1972 Imola 200 Formula 750 race. Owing to its uniqueness and rarity, the 750 SS has become extremely expensive and desirable, fetching prices beyond the most expensive contemporary Ducati; for Ducatisti, it is the Holy Grail.
