The 916 spearheaded the Ducati revival of the 1990s. Introduced at the end of 1993, this product of Massimo Tamburini and the Cagiva Research Centre took the water-cooled four-valve engine of the 851, placing it in an evolutionary chassis with revolutionary styling. The 916 immediately set new standards of performance for twin-cylinder machines, epitomised by its unequalled success in the World Superbike Championship. This book will trace the conception and development of the four-valve Ducati from its first appearance at the Bol d'Or in 1986. By 1990 Raymond Roche gave Ducati their first World Superbike Championship, this being followed by Texan Doug Polen. Star British rider Carl Fogarty then took over the reins, and along with Troy Corser and Troy Bayliss dominated the World Superbike Championship from 1994 until 2001. Along with the factory racers, all the related four-valve models will be covered in depth, from the initial 851 and 888, to the 748, ST4 and 996. All the variants, including the Sport Production series, will be detailed, along with the rare and beautiful Supermono. This book is the definitive guide to these legendary Ducati models. Ian Falloon is one of the world's leading motorcycle historians. He has more than 40 years experience with motorcycles, spent 25 years writing for magazines around the world, and has written numerous books about motorcycles. He specialises in Italian marques such as Moto Guzzi, Laverda, MV Agusta, and of course, Ducati.

Ducati stunned the world in 1988 when the struggling, small Italian firm unleashed its Desmoquattro -- 8-valve, desmodromic -- Superbike. The bike found success on the world's racetracks right from the start. Road-going versions soon carried that success to the general public, proving this design wasn't just another noisy prototype. The Superbikes -- 748, 851, 888, 916, and 996 -- are now Ducati's best-selling machines in the United States; and the Desmoquattro engine found its way into the company's more pedestrian series such as the Monster roadster and ST4 sport-tour. This is the comprehensive volume on Ducati's ultimate performance motorcycles and replaces the out-of-print Ducati Super Bikes: 851, 888, 916.
