The Complete Book of Ducati Motorcycles, 2nd Edition

Many books have been published about Italian motorcycles, but none has focused exclusively on the Italian motorcycle-based chopper, bobber, trike, and quad custom bike scene – until now. Even though customising is not normally associated with Italian brands, there are some fantastic individually-built Italian custom bikes out there, old and new. In recognition of the trend, Ducati entered into a new market segment when it launched its power cruiser Diavel in November 2010, while Moto Guzzi has its Aquila Nero range ... these and many other custom-style bikes have been well-received in the customs scene. This book looks at some of the fascinating custom projects around the world,

accompanied by stunning photography of the finished bikes. A great book for Italian bike fans, and fans of the custom bike scene in general.

Excerpt: The next new Ducati engine to appear after the Ducati Apollo was the 90 V twin, initial Grand Prix racing versions being 500 cc, and the production bikes were 750 cc. The Mille used a plain bearing crank, like the belt models. Generally, any two-cylinder motorcycle engine with its two cylinders at an equidistant opposite angles from the center rotation of the crankshaft is referred to as a V-twin. The Ducati V-twin is unique in that the "V" is tilted forward so the front cylinder is nearly parallel to the ground, leading many to refer to it as an "L-Twin" engine instead. Either usage is correct since a "V-twin" engine is not designated by a specific angle. L-twin refers, in fact, to a configuration with a 90 degree angle between...
