The ST2's fuel-injected engine is not closely

The Ducati ST2 has an engine derived from

the 907 Ducati Paso, which had Ducati's signature 90 ° V-twin (or L-twin), SOHC, 2-valve desmodromic heads, Remus exhausts, 10.2:1 compression and Webber-Marelli electronic fuel injection with one injector and one spark plug per cylinder.

The most powerful 900 2V in standard trim, the new SS / Monster engine has longer duration/higher lift cams than the carb SS engine. Apart from that and the efi, I believe they are basically the same.
