The Second Machine Age: Work, Progress, and Prosperity in a Time of Brilliant Technologies Routledge
"I too am not a bit tamed—I too am untranslatable / I sound my barbaric yawp over the roofs of the world."—Walt Whitman, "Song of Myself," Leaves of Grass
The American Yawp is a free, online, collaboratively built American history textbook. Over 300 historians joined together to create the book they wanted for their own students—an accessible, synthetic

narrative that reflects the best of recent historical scholarship and provides a jumping-off point for discussions in the U.S. history classroom and beyond. Long before Whitman and long after, Americans have sung something collectively amid the deafening roar of their many individual voices. The Yawp highlights the dynamism and conflict inherent in the history of the United States, while also looking for the common threads that help us make sense of the past. Without losing sight of politics and power, The American Yawp incorporates transnational perspectives, integrates diverse voices, recovers narratives of resistance, and explores the complex process of cultural creation. It looks for America in crowded slave cabins, bustling markets, congested tenements, and marbled halls. It navigates between maternity wards, prisons, streets, bars, and boardrooms. The fully peer-reviewed edition of The American Yawp will be available in two print volumes designed for the U.S. history survey. Volume I begins with the indigenous people who called the Americas home before chronicling the collision of Native Americans, Europeans, and Africans. The American Yawp traces the development of colonial society in the context of the larger Atlantic World and investigates the origins and ruptures of slavery, the American

Revolution, and the new nation's development and rebirth through the Civil War and Reconstruction. Rather than asserting a fixed narrative of American progress, *The American Yawp* gives students a starting point for asking their own questions about how the past informs the problems and opportunities that we confront today.

"The ultimate literary bucket list." —THE WASHINGTON POST

Celebrate the pleasure of reading and the thrill of discovering new titles in an extraordinary book that's as compulsively readable, entertaining, surprising, and enlightening as the 1,000-plus titles it recommends. Covering fiction, poetry, science and science fiction, memoir, travel writing, biography, children's books, history, and more, *1,000 Books to Read Before You Die* ranges across cultures and through time to offer an eclectic collection of works that each deserve to come with the

recommendation, You have to read this. But it's not a proscriptive list of the "great works"—rather, it's a celebration of the glorious mosaic that is our literary heritage. Flip it open to any page and be transfixed by a fresh take on a very favorite book. Or come across a title you always meant to read and never got around to. Or, like browsing in the best kind of bookshop, stumble on a completely unknown author and work, and feel that tingle of discovery. There are classics, of course, and unexpected treasures, too. Lists to help pick and choose, like *Offbeat Escapes*, or *A Long Climb*, but *What a View*. And its alphabetical arrangement by author assures that surprises await on almost every turn of the page, with Cormac McCarthy and *The Road* next to Robert McCloskey and *Make Way for Ducklings*, Alice Walker next to Izaak Walton. There are nuts and bolts, too—best editions to read, other books by the author, "if you like this, you'll like that" recommendations, and an interesting endnote of adaptations where appropriate. Add it all

up, and in fact there are more than six thousand titles by nearly four thousand authors mentioned—a life-changing list for a lifetime of reading. "948 pages later, you still want more!" —THE WASHINGTON POST

The captivity narrative has always been a literary genre associated with America. Joe Snader argues, however, that captivity narratives emerged much earlier in Britain, coinciding with European colonial expansion, the development of anthropology, and the rise of liberal political thought. Stories of Europeans held captive in the Middle East, America, Africa, and Southeast Asia appeared in the British press from the late sixteenth through the late eighteenth centuries, and captivity narratives were frequently featured during the early

development of the novel. Until the mid-eighteenth century, British examples of the genre outpaced their American cousins in length, frequency of publication, attention to anthropological detail, and subjective complexity. Using both new and canonical texts, Snader shows that foreign captivity was a favorite topic in eighteenth-century Britain. An adaptable and expansive genre, these narratives used set plots and stereotypes originating in Mediterranean power struggles and relocated in a variety of settings, particularly eastern lands. The narratives' rhetorical strategies and cultural assumptions often grew out of centuries of religious strife and coincided with Europe's early modern military ascendancy. Caught Between Worlds presents a broad, rich, and flexible definition of the captivity narrative, placing the American strain in its proper place within the tradition as a whole. Snader, having assembled the first bibliography of British captivity narratives, analyzes both factual texts and a large body of fictional works, revealing the ways they helped define British identity and challenged Britons to rethink the place of their nation in the larger world.

The Politics of Imagination offers a multidisciplinary perspective on the contemporary relationship between politics and the imagination. What role does our capacity to form images play in politics? And can we define politics as a struggle for people's imagination? As a result of the increasingly central place of the media in our lives, the political role of imagination has undergone a massive quantitative and a qualitative change. As such, there has been a revival of interest in the concept of imagination, as the intimate connections between our capacity to form images and politics becomes more and more evident. Bringing together scholars from different disciplines and theoretical outlooks, The Politics of Imagination examines how the power of imagination reverberates in the various ambits of social and political life: in law, history, art, gender, economy, religion and the natural sciences. And it will be of considerable interest to those with contemporary interests in philosophy, political philosophy, political science, legal theory, gender studies, sociology, nationalism, identity studies, cultural studies, and media studies.

The darkly comic Transparent Things, one of Nabokov's final books, traces the bleak life of Hugh Person through murder, madness, prison and trips to

Switzerland. One of these was the last journey his father ever took; on another, having been sent to ingratiate himself with a distinguished novelist, he met his future wife. Nabokov's brilliant short novel sinks into the transparent things of the world that surround this one Person, to the silent histories they carry. Remarkable even in Nabokov's work for its depth and lyricism, *Transparent Things* is a small, experimental marvel of memories and dreams, both sentimental and malign. Part of a major new series of the works of Vladimir Nabokov, author of *Lolita* and *Pale Fire*, in Penguin Classics. *Under the Mediterranean* Shanti Arts Publishing

Twenty years ago a man made a child he never intended to love. Ten years ago the world ended and Emma turned her back on the man she believed was her father...in an attempt to survive. Eight weeks ago she discovered the truth about her family, including the sister she never knew she had. Last week she had her heart broken by the one man she never imagined giving it to. Yesterday she turned her back on those she cared for in an attempt to help them survive. Today she plans on hunting two men to the ends of the broken earth. Not to save the world. Not to make the world a better place. Tomorrow... she plans on getting revenge.

The truth is subjective to what the lonely lets in. Emalyn Spicer has lived with it for a long time. She thinks it goes back further than her memories do. She knows it goes back further than the OCD. When she arrives at college, her OCD's and the lonely refuse to let her have her wish to be normal. When she meets Sebastian and starts to fall for him, she lets herself believe it's possible to outrun the things chasing her from the past. But how do you get away from the things inside of you? How do you run from yourself? Just as she gives up and succumbs to the lonely, the unthinkable happens. She finds herself once again trapped in the dark, once again held against her will. This time she meets the lonely head on. In the darkest corners of her mind, she discovers there is more to her world than she ever imagined. She discovers that the lonely was there for her, protecting her from herself and her secrets. How far would you go to find yourself?

Sixteen essays ranging from lyric essays to narrative journalism address how we make sense of what we cannot know, how we make change in the world, how we heal, and how we

know when we are home. Collectively, these essays convey the longing for agency and connection, particularly among women. They will resonate with readers of all ages, but perhaps especially with women in the second half of life, those dealing with aging parents, retirement, illness, and accompanying vulnerabilities. Here readers will find comfort within keen reflection upon life's ambiguities.

"Why do I always see the numbers 444 (or 111, 333, etc.) everywhere I go?" is one of the most frequently asked questions that Doreen Virtue receives at her worldwide workshops. In her best-selling book *Healing with the Angels*, Doreen included a chapter that briefly explained the meanings behind these number sequences, and many people have commented that they carry the book with them everywhere to help them interpret the numbers they see daily. By popular request from Doreen's audience members, *Angel Numbers* has been created to serve as a pocket guide containing the angelic meanings of numbers from 0 to 999. Designed to fit into a purse or pocket for easy transport, *Angel Numbers* provides an interpretation of more complex number

sequences than was previously available in *Healing with the Angels*. This new book focuses on numbers such as 123, 337, 885, and so on. Whether you're seeing these numbers on license plates, telephone numbers, the clock, or other locations, they're very real messages from the angels. *Angel Numbers* will help you instantly understand the meaning of these signs!

SCIENCE AND EMPIRES: FROM THE INTERNATIONAL COLLOQUIUM TO THE BOOK Patrick PETITJEAN, Catherine JAMI and Anne Marie MOULIN The International Colloquium "Science and Empires - Historical Studies about Scientific Development and European Expansion" is the product of an International Colloquium, "Sciences and Empires - A Comparative History of Scientific Exchanges: European Expansion and Scientific Development in Asian, African, American and Oceanian Countries". Organized by the

REHSEIS group (Research on Epistemology and History of Exact Sciences and Scientific Institutions) of CNRS (National Center for Scientific Research), the colloquium was held from 3 to 6 April 1990 in the UNESCO building in Paris. This colloquium was an idea of Professor Roshdi Rashed who initiated this field of studies in France some years ago, and proposed "Sciences and Empires" as one of the main research programmes for the project to organize such a colloquium was a bit of a gamble. Its subject, reflected in the title "Sciences and Empires", is not a currently accepted sub-discipline of the history of science; rather, it refers to a set of questions which found autonomy only recently. The terminology was strongly debated by the participants and, as is frequently suggested in this book, awaits fuller clarification.

White Girl Problems Stanford University Press
The conclusion to *Imaginations, Duplicities* The last city of men has changed. Only those who remember yesterday can see it. There is tension in the air and violence in the corners you aren't supposed to notice. But Gwyn, a young girl in the orchard community, has a different problem. Her learned memories seem to be gone, even the ones that make her who she is. She wakes every morning, startled by

the man next to her and the shack of a house they live in. Even the ordinariness of her clothing seems out of place. There is a thirst for adventure lingering in her throat and hunger for revenge she cannot place eating away at her stomach. And just when she thinks she has it all figured out, everything changes. A pair of green eyes find her on the train. A pair of green eyes she knows from somewhere. Don't miss the exciting conclusion to *Imaginations Big Blue Sky* Hay House, Inc Honor Frost has written a travel book with this difference: her journeys have extended below the surface of the sea. Her accounts of these regions can be compared with the writings of early travellers who, unhampered by overspecialization, recorded a variety of observations on completely unknown places. In setting down her direct experience she has thrown new light on the much discussed subject of underwater archaeology. This book contains 22 colour and 28 monochrome photographs by well known divers, also 52 plans and drawings by the author illustrating her arguments. It is addressed to travellers.

When Computers Were Human Hachette Books
Where did SARS come from? Have we inherited genes from Neanderthals? How do plants use their

internal clock? The genomic revolution in biology enables us to answer such questions. But the revolution would have been impossible without the support of powerful computational and statistical methods that enable us to exploit genomic data. Many universities are introducing courses to train the next generation of bioinformaticians: biologists fluent in mathematics and computer science, and data analysts familiar with biology. This readable and entertaining book, based on successful taught courses, provides a roadmap to navigate entry to this field. It guides the reader through key achievements of bioinformatics, using a hands-on approach. Statistical sequence analysis, sequence alignment, hidden Markov models, gene and motif finding and more, are introduced in a rigorous yet accessible way. A companion website provides the reader with Matlab-related software tools for reproducing the steps demonstrated in the book.

Babe Walker, center of the universe, is a painstakingly manicured white girl with an expensive smoothie habit, a proclivity for Louboutins,

a mysterious mother she's never met, and approximately 50 bajillion Twitter followers. But her "problems" have landed her in shopping rehab—that's what happens when you spend \$246,893.50 in one afternoon at Barneys. Now she's decided to write her memoir, revealing the gut-wrenching hurdles she's had to overcome in order to be perfect in every way, every day. Hurdles such as: I hate my horse. Every job I've ever had is the worst job I've ever had. He's not a doctor, a lawyer, or a prince. I'll eat anything, as long as it's gluten-free, dairy-free, low-carb, low-fat, low-calorie, sugar-free, and organic. In an Adderall-induced flash of inspiration, Babe Walker has managed to create one of the most enjoyable, unforgettable memoirs in years.

This book traces the uneven history of queer media visibility through crucial turning points including the Hollywood Production Code era, the AIDS crisis of the 1980s, the so-called explosion of gay visibility on television during the 1990s, and the re-imagining of queer representations on

TV after the events of 9/11. Kohlen intervenes in previous academic and popular accounts that paint the increase in queer visibility over the past four decades as a largely progressive development. She examines how and why a limited and limiting concept of queer visibility structured around white gay and lesbian characters in committed relationships has become the embodiment of progressive LGBT media representations. She also investigates queer visibility across film, TV, and print media, and highlights previously unexplored connections, such as the lingering traces of classical Hollywood cinema's queer tropes in the X-Men franchise. Across all chapters, narratives and arguments emerge that demonstrate how queer visibility shapes and reflects not only media representations, but the real and imagined geographies, histories, and people of the American nation.

Young Adult literature, from *The Outsiders* to *Harry Potter*, has helped shape the cultural landscape for adolescents perhaps more than any other form of consumable media in the twentieth and twenty-first century. With the rise of mega blockbuster films based on these books in recent years, the young adult genre is being co-opted by curious adult readers and by Hollywood producers. However, while the genre may be getting more readers than ever before, Young Adult literature remains exclusionary and problematic: few titles feature historically marginalized individuals, the books present heteronormative perspectives, and gender stereotypes continue to persist. Taking a critical approach, *Young Adult Literature: Challenging Genres* offers educators, youth librarians, and students a set of strategies for unpacking, challenging, and transforming the assumptions of some of the genre's most popular titles. Pushing the genre forward, Antero Garcia builds on his experiences as a former high school teacher to offer strategies for integrating Young Adult literature in a contemporary critical pedagogy through the use of participatory media.
