With the proven formula that EMOTIONS ARE THE POWER BEHIND our thoughts and actions, comes on the heels of the highly recognized self-help DVD titled The Secret by Rhonda Byrne that proclaims thoughts are our power, as opposed to the emphasis being on that of emotions. The Secret along with many other notable self-help books are helping a lot of people and yet, according to Neil Fiore, PhD, a Berkeley, Calif.-based psychologist "It can cause people greater stress by worrying if they're causing cancer by having the wrong thoughts and emotions." Karen LaVoie, author of Life ABSOLUTES agrees with the aforementioned statement. This is one of the factors that sets her book apart from other self-help books. Life ABSOLUTES gives the complete formula for life to everyone willing to apply it, and live it life long commitment. What this book offers is not a quick fix solution or sweep your emotions, thoughts or troubles under the carpet and pretend they do not exist. Instead, it gives the reader the ability to powerfully and quickly acknowledge them, gain greater wisdom from every life situation, by finding the positive in the situation while turning it into an opportunity for mastery. This program is about accountability and taking charge once and for all how one chooses to react to persons, places, situations, things and opportunities, eventually removing them permanently from their life. The corner stone to Life ABSOLUTES is the understanding that a persons emotions are 4 times more powerful than their thoughts. So once a person starts acknowledging his or her emotions and gaining mastery over them, his or her thoughts and actions follow in suit. When a persons emotions are positive, the thoughts and actions are the same. Thus, creating, manifesting and or attracting a positive outcome. Everyone is accountable for their choicestheir

emotions, thoughts and actions. And our choices start with our emotions. NOT our thoughts. The quote so overly used for many years has been, As a man thinketh, so is he. The quote actually reads as follows, As a man thinketh in his heart, so is he depending on the bible you use as your source. The valuable word heart was used to provide this useful truth. Our emotions are our power. Life ABSOLUTES, clearly, precisely and simply gives examples and drawings explaining the Law of Attraction Like Attracts Like. So the reader understands their accountability to life in a guilt free way and yet, is still accountable to all life. Be Selfless. NOT the gratification of the quick fix, the EGOMe, ME, ME. All life. We are all of one energy. The Law of Life is put forth in great detail in this book: Energy qualified with emotions (through our attention: sight, touch, smell, taste and hearing) triggers thoughts, which triggers actions, which equals an outcome, is one a person must apply, live and BE should they want positive results outpictured in their life. The law of attraction is not about one just sitting and visualizing money and money falls out of the sky, one must be in service to life. However, visualization is very important. There is an entire chapter dedicated to this truth. Life ABSOLUTES is a perfect blend of quantum physics in action and spiritual awareness that we are not an island. Whether you believe in God, higher beings or the big bang theory, this book is for you. It is masterfully balanced. Truthful. Honest and fluff-free. While being practical, conversational, inspiring and evoking a few laughs. This book covers mastery of: personal self, professional self, taking charge of ones well-being while creating more successes whether they be emotional or tangible. Whether they be financial, personal, professional or spiritual. This instruction manual for life works for anyone and everyone seeking a more joyful, harmonious, abundant, stress free and blessed life. About the Author. The formula put forth in this book saved her life.

Bayesian Networks, the result of the convergence of artificial intelligence with statistics, are growing in popularity. Their versatility and modelling power is now employed across a variety of fields for the purposes of analysis, simulation, prediction and diagnosis. This book provides a general introduction to Bayesian networks, defining and illustrating the basic concepts with pedagogical examples and twenty real-life case studies drawn from a range of fields including medicine, computing, natural sciences and engineering. Designed to help analysts, engineers, scientists and professionals taking part in complex decision processes to successfully implement Bayesian networks, this book equips readers with proven methods to generate, calibrate, evaluate and validate Bayesian networks. The book: Provides the tools to overcome common practical challenges such as the treatment of missing input data, interaction with experts and decision makers, determination of the optimal granularity and size of the model.

Highlights the strengths of Bayesian networks whilst also presenting a discussion of their limitations. Compares Bayesian networks with other modelling techniques such as neural networks, fuzzy logic and fault trees. Describes, for ease of comparison, the main features of the major Bayesian network software packages: Netica, Hugin, Elvira and Discoverer, from the point of view of the user. Offers a historical perspective on the subject and analyses future directions for research. Written by leading experts with practical experience of applying Bayesian networks in finance, banking, medicine, robotics, civil engineering, geology, geography, genetics, forensic science, ecology, and industry, the book has much to offer both practitioners and researchers involved in statistical analysis or modelling in any of these fields.

*Health and Happiness* John Wiley & Sons

"Audiovisual Translation: Subtitling" is an introductory textbook which provides a solid overview of the world of subtitling. Based on sound research and first-hand experience in the field, the book focuses on generally accepted practice but identifies current points of contention, takes regional and medium-bound variants into consideration, and traces new developments that may have an influence on the evolution of the profession. The individual chapters cover the rules of good subtitling practice, the linguistic and semiotic dimensions of subtitling, the professional environment, technical considerations, and key concepts and conventions, providing access to the core skills and knowledge needed to subtitle for television, cinema and DVD. Also included are graded exercises covering core skills. "Audiovisual Translation: Subtitling" can be used by teachers and students as a coursebook for the classroom or for self-learning. It is also aimed at translators and other language professionals wishing to expand their sphere of activity. While the working language of the book is English, an accompanying DVD contains sample film material in Dutch, English, French, Italian and Spanish, as well as a range of dialogue lists and a key to some of the exercises. The DVD also includes WinCAPS, SysMedia's professional subtitling preparation software package, used for broadcast television around the world and for many of the latest multinational DVD releases of major Hollywood projects.
