FLAVINE EXW - Combines excellent wet and  
overall fastness levels SYNOLON GOLDEN  
YELLOW EXW - No staining on spandex  
during the dyeing process SYNOLON  
YELLOW BROWN Disperse Dyes – KISCO  
*Dyeing Process Kisco - api.surfellent.com*  
The traditional dyeing process is described as a  
black box, in which the amount of dye on the  
fabric is not known until the dyeing is  
completed. Advances in spectrophotometry and  
computation have enabled an indirect  
determination of the amount of dye on fabric  
during the dyeing process based on Beer's law.  
The principles of a dyebath monitoring  
technology that allow the analysis and control  
of the dyeing process are introduced.
